1 OVERVIEW

1.1 INFORMATION ABOUT EVROTRUST TECHNOLOGIES AD

Evrotrust Technologies AD (hereinafter, **Evrotrust**) is a qualified provider of trust services carrying out its activities in accordance with the current requirements of Regulation (EU) No 910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market and repealing Directive 1999/93/EC (hereinafter, **Regulation (EU) No 910/2014**) and the Bulgarian Electronic Document and Electronic Trust Services Act (hereinafter, **EDE TSA**), included in the Trusted list of trust service providers of the European Commission and in the register of the Bulgarian trust service providers kept by the Communications Regulation Commission (hereinafter, the **CRC**) in the Republic of Bulgaria. Contact details of Evrotrust:

Company name	Evrotrust Technologies AD
UIC	203397356
Seat, registered address and postal address	251G Okolovrasten pat Str., Business center MM, floor 5, 1766 Sofia, Bulgaria
Office address and internal registration authority address	251G Okolovrasten pat Str., Business center MM, floor 5, 1766 Sofia, Bulgaria
Tel.	+359 2 448 58 58
E-mail address	info@evrotrust.com office@evrotrust.com
Web page/ website	https://www.evrotrust.com/

1.2 SUBSCRIBERS SERVICE

Evrotrust provides electronic identification services and different qualified and non-qualified trust services through a Certification Authority and an internal Registration Authority as well as through a network of external Registration Authorities. The external Registration Authorities perform their activities for the provision of trust services on behalf of Evrotrust.

1.3 SUPERVISORY AUTHORITY

CRC is the national supervisory authority in the Republic of Bulgaria exercising the powers under Regulation (EU) No 910/2014 and EDETS. On the grounds of Art. 32 of EDETS, CRC grants qualified status to trust services providers, controls the observation of security requirements and creates, maintains and publishes the national trusted list of persons providing trust services and qualified trust services.

1.4 GENERAL TERMS AND CONDITIONS. ACCESS TO AND PROVISION OF THE GENERAL TERMS AND CONDITIONS ON A DURABLE MEDIA

1.4.1. This document constitutes the General Terms and Conditions under which the contracts for using the trust, cryptographic, information and other services provided by Evrotrust are concluded (hereinafter, **the General Terms and Conditions** or **GTC**) and forms an integral part of the contracts for using the respective services. This document has an assigned unique object identifier (OID): 1.3.6.1.4.1.47272.3.1.2.

1.4.2. These General Terms and Conditions are applied to the relationship of Evrotrust with all Subscribers, more specifically with Signatories, Creators and all other Subscribers who have concluded a contract with Evrotrust for services provided by Evrotrust according to the procedure described herein. These GTC are also applied with respect to the Relying Parties who rely on electronic identification or on a trust service provided by Evrotrust, insofar as this document contains the measure of due care that the Relying Parties should exercise.

1.4.3. These General Terms and Conditions are publicly available on Evrotrust's web page <https://www.evrotrust.com/>, in Evrotrust's mobile applications, and in any office of Evrotrust or of an external Registration Authority of Evrotrust.

1.4.4. Each Subscriber and each Relying Party undertakes to make themselves familiar with these General Terms and Conditions before concluding a contract with Evrotrust and using any of the services subject to these GTC and, respectively, before trusting and relying, as a Relying Party, on electronic identification or a trust service provided by Evrotrust.

1.4.5. Depending on the manner in which Evrotrust's services are requested and/or used by the Subscribers and the Relying Parties, these General Terms and Conditions are provided and accessible in a suitable way in a readable form and on a durable medium as follows:

(1) When a contract is concluded with Evrotrust in an office of Evrotrust or an office of an external Registration Authority of Evrotrust on paper, these GTC are provided to the Subscriber in on paper.

(2) When a contract is concluded with Evrotrust in electronic form, through a channel of communication with Evrotrust other than a mobile application (including SDK integrations thereof), these GTC are provided to the Subscriber on a durable medium by sending them as an attached file by e-mail to an e-mail address indicated by the Subscriber during the conclusion of the contract. If the Subscriber does not have an e-mail address and/or the Policies and Practices applicable to the specific service(s) that are subject to the contract allow the provision of those services without the Subscriber supplying a valid e-mail address, the GTC are sent to the Subscriber through a link in an SMS with the instruction that they should be immediately downloaded by the Subscriber and saved on their local device. In the event that during the provision of a given service, Evrotrust does not receive the Subscriber's contact details, the GTC may be provided to the Subscriber by a relevant Relying Party to whom Evrotrust assigns this, by e-mail or in another way ensuring receipt of the GTC by the user on a durable medium.

(3) When the contract is concluded through Evrotrust's mobile application, the GTC signed by the Subscriber and Evrotrust are available for downloading in the Mobile Application. In such cases, the Subscriber undertakes to download and store on their local device the documents signed upon the conclusion of the contract under these GTC (GTC, Privacy Policy, Declaration(s) of Consent, etc.).

(4) When concluding the contract through a third-party mobile application with an integrated Software Development Kit (SDK) module of Evrotrust, the text of the General Terms and

Conditions can be visualized and stored by the Subscriber after accessing their profile in the Evrotrust Mobile Application.

(5) In addition to the foregoing, GTC are available in readable form for a long period of time on Evrotrust's website in a format allowing for them to be downloaded, stored and reproduced in electronic form, as well as printed out on paper. Upon request at an office of Evrotrust, they can be provided to the Subscriber in paper form at any time.

2 SERVICES PROVIDED BY EVROTRUST

These General Terms and Conditions are applied in the relationship between Evrotrust and the Subscribers as well as in the relationship between Evrotrust and the Relying Parties when and insofar as any of the trust or other services described further on in this section is provided.

2.1 ISSUANCE OF A QUALIFIED CERTIFICATE FOR ELECTRONIC SIGNATURE

A Qualified Certificate for Electronic Signature in accordance with Art. 28 of Regulation (EU) No 910/2014 is issued only to a natural person (hereinafter, **Electronic Signature Signatory/ Signatory**). Depending on the profile and the issuance Policy, such a certificate may be used to certify authorship on electronic documents, for identification or authentication upon access to web applications, protected communications and electronic signing of documents (in different standards - PDF (PaDES), XML (XaDES), and other standard formats (CaDES). Qualified certificates for electronic signature may also be used to sign document packages (ASiC-E), as well as e-mails (based on S/MIME (Secure/ Multipurpose Internet Mail Extensions/ Protocol for secure e-mail transmission via the Internet or a cryptographic system for protecting the messages transmitted via e-mail and the data stored on various media).

The certificate may also include data about a legal entity associated with the Signatory on whose behalf the Signatory will sign. In such case, Evrotrust does not certify the representative power of the natural person Signatory against the legal entity but only that a legal relationship has existed between them as of the moment of issuing the certificate. The issuance of each of the certificates under items 2.1.1 - 2.1.3 is a qualified trust service according to Regulation (EU) No 910/2014.

The types of profiles of qualified certificates for electronic signature issued by Evrotrust are:

2.1.1. Evrotrust Qualified Certificate for QES, OID: 1.3.6.1.4.1.47272.2.2

A Qualified Certificate for QES (hereinafter, **QCQES**) is issued for the purpose of establishing the authorship of a natural person Signatory on electronic documents signed electronically and accompanied by the certificate.

2.1.2. Evrotrust Qualified Attribute Certificate for QES, OID: 1.3.6.1.4.1.47272.2.2.1

A Qualified Attribute Certificate for QES (hereinafter, **Attribute QCQES**) is issued for the purpose of identifying the natural person Signatory with specific additional attributes as described in the certificate. All procedures and rules for its issuance and management match those of the certificate under item 2.1.1. The difference in the case of this certificate consists in the volume and type of the data certified.

The services under item 2.1.1 and item 2.1.2 are related to using a Qualified (Electronic) Signature Creation Device (hereinafter, **QSCD**) when creating an electronic signature. The "Qualified Statements" attribute in the certificate contains an instruction that the certificate is qualified and shows whether the private key has been used for creating the electronic signature in a Qualified (Electronic) Signature Creation Device. The Qualified (Electronic) Signature Creation Device may be managed by Evrotrust upon assignment by the Subscriber and used by the latter remotely through the qualified service for management of remote electronic signature/seal creation devices under item 2.4.1 below or, where applicable, it can be a portable cryptographic device in the physical possession of the Signatory ("smart card"). In the latter case, Evrotrust issues the certificate and hands it over to the signatory or to a person expressly authorized by the Signatory. By accepting these General Terms and Conditions when requesting this service, it is considered that the Signatory agrees to the use of the Qualified (Electronic) Signature Creation Device.

2.1.3. Evrotrust Qualified Certificate for AES, OID: 1.3.6.1.4.1.47272.2.7

A Qualified Certificate for Advanced Electronic Signature (QCAES) is issued in compliance with all Policies and Practices for issuing qualified certificates under 2.1.1 and 2.1.2. The difference to the certificates issued under items 2.1.1 and 2.1.2 is that when a QCAES is used the electronic signature is not created in a Qualified (Electronic) Signature Creation Device.

2.2 ISSUANCE OF A NON-QUALIFIED CERTIFICATE FOR ADVANCED ELECTRONIC

**SIGNATURE, (Evrotrust Advanced Natural Person Certificate for AES), OID:
1.3.6.1.4.1.47272.4.1.2.**

A non-qualified certificate for advanced electronic signature is issued by Evrotrust to Signatories who are natural persons. Such certificates are used for creating (signing with) an advanced electronic signature within the meaning of and in compliance with the requirements of Art. 26 of Regulation (EU) No 910/2014. Unlike the service under Art. 2.1.3 above, the advanced electronic signature created on the basis of a non-qualified certificate is not accompanied by a qualified certificate within the meaning of Art. 3, para. (15) and Art. 28 of Regulation (EU) No 910/2014. The issuance and use of a non-qualified certificate for an advanced electronic signature can be requested by the Signatory remotely by using the service under item 2.4.2 below. Such certificates can also be used for signing packages of documents (ASiC-E). The issuance and use of non-qualified certificates for advanced electronic signatures comply with the relevant requirements of Regulation (EU) No 910/2014 and the applicable standards and Policies for this purpose.

2.3 ISSUANCE OF A QUALIFIED CERTIFICATE FOR ELECTRONIC SEAL

A Qualified Certificate for Electronic Seal is issued only to a legal person (Seal Creator/ Creator) and may be used to guarantee the origin and integrity of the legal person's output data, for instance: electronic documents, photographs, architectural projects, software, etc. This trust service of Evrotrust is provided in accordance with Art. 38 of Regulation (EU) No 910/2014. Issuance of each of the certificates under items 2.4.1 – 2.4.3. is a qualified trust service under Regulation (EU) No 910/2014.

The types of profiles of Qualified Certificates for Electronic Seal issued by Evrotrust are:

**2.3.1. Evrotrust Qualified Legal Person/Organization Certificate for QESeal, OID:
1.3.6.1.4.1.47272.2.3 - a qualified trust service**

This service is related to the use of a Qualified (Electronic) Signature/ Seal Creation Device (QSCD) when creating the electronic seal. The "Qualified Statements" attribute in the certificate contains an instruction that the certificate is qualified and shows whether the private key has been used for creating the electronic seal in a Qualified (Electronic) Signature Creation Device. Evrotrust issues the certificate and delivers it to a person empowered by the legal entity Creator.

By accepting these General Terms and Conditions when requesting this service, it is considered that the Creator agrees to use a qualified device for the creation of a qualified electronic signature.

**2.3.2. Evrotrust Qualified Legal Person/Organization Certificate for ASeal, OID:
1.3.6.1.4.1.47272.2.8**

This qualified certificate is issued in compliance with all Policies and Practices for the issuance of a qualified certificate under 2.4.1 above. The difference here is that the electronic seal is not created in a Qualified Electronic Seal Creation Device.

**2.3.3. Evrotrust Qualified PSD2 Legal Person/Organization Certificate for ASeal, OID:
1.3.6.1.4.1.47272.2.8.1**

This certificate is intended to be used for fulfilling the requirements of the Payment Service Directive (Directive (EU) No 2015/2366; PSD2).

**2.4 SERVICES FOR MANAGEMENT OF REMOTE ELECTRONIC SIGNATURE/ SEAL
CREATION DEVICES**

**2.4.1 Qualified Service for Management of Remote Electronic Signature/ Seal Creation
Devices**

This service allows the remote signing with a qualified signature or, respectively, the remote creation of a qualified electronic seal. When this service is used, the electronic signature/ seal is created with a "remote qualified signature/seal creation device" – the seal creation device is not a personal device physically controlled by the Signatory/ Creator but is replaced by services offered and managed by Evrotrust. When this service is used, the Electronic Signature Signatory/ the Electronic Seal Creator assigns Evrotrust with the management of the environment for creating an electronic signature seal on their behalf and the servicing of the Qualified Electronic Signature/ Seal Creation Devices, and Evrotrust applies mechanisms and procedures meeting the requirements of Regulation (EU) No 910/2014, including Art. 29a thereof, and guaranteeing that upon provision of the service the requirements to creating of electronic signatures/seals are met. In particular, Evrotrust applies specific procedures concerning the security of management and the administrative security and uses reliable systems and products, including secure electronic

communication channels, a reliable electronic signature/seal creation environment, and guarantees that this environment is used only under the control of the Electronic Signature Signatory/ Electronic Seal Creator ('sole control'). The service is provided also pursuant to the requirements of applicable standards for remote qualified electronic signature creation in a remote-signing hardware cryptomodule certified by an accredited laboratory and a protected certified environment (Tamper-protected Environment), as well as observing the Policy and Practice for remote signing.

The Service for Management of Remote Electronic Signature/ Seal Creation Devices is accessible:

1. Through Evrotrust's Mobile Application installed on a smart device;
2. When signing with a short-term certificate for electronic signature outside of the Mobile Application.

The Service for Management of Remote Electronic Signature/ Seal Creation Devices may be used for signing an electronic document, hash value of an electronic document, or an electronic document package. When the service is used for signing of a hash value, the Subscriber understands and consents that their qualified or non-qualified certificate for electronic signature be provided to the relevant Relying Party, for the purpose of calculating the hash value of the electronic document(s) to be signed and thus enabling the technical execution of the service. Evrotrust has no way of knowing and is not liable for guaranteeing that the hash value received for signing corresponds to any specific document or content. The validity and contents of the electronic document(s) corresponding to the hash value provided for signing are subject to the relationship between the Subscriber and the Relying Party.

2.4.2 Non-qualified Service for Management of Remote Qualified Electronic Signature / Seal Creation Device

Evrotrust provides a non-qualified service for management of remote electronic signatures/seals creation devices. This service allows for remote signing with an advanced electronic signature or, respectively, remote creation of an advanced electronic seal. When using this service, the electronic signature/seal is created with a device for creating an electronic signature/seal remotely, which is not a personal device under the physical control of the

Holder/Creator, but is replaced by the service offered and managed by Evrotrust. When using this service, the Holder of the electronic signature/Creator of the electronic seal assigns Evrotrust to manage the environment for creating an electronic signature/seal on their behalf and to service the relevant devices, and Evrotrust applies mechanisms and procedures ensuring that the requirements for creating an advanced electronic signature/seal are met when providing the service. When providing the service, Evrotrust complies with the requirements for non-qualified trust services and for creating advanced electronic signatures/seals, applicable under Regulation (EU) No 910/2014.

The non-qualified service for management of remote electronic signatures/seals creation devices is available upon requesting a short-term non-qualified certificate for an advanced electronic signature - such a certificate is issued by Evrotrust to the Holder for the purposes of a one-time signing of an electronic document or a package of electronic documents outside the Mobile Application.

2.5 ISSUANCE OF A QUALIFIED CERTIFICATE FOR WEBSITE AUTHENTICATION

A Qualified Certificate for Website Authentication is issued for the purpose of certifying the holding of a website by a particular natural person or legal entity. It is intended to be used for creating certainty in a visitor that the website is maintained by a real and identified subject. The use of SSL-technology ensures reliable connectivity under a secure protocol for the exchange of information between the website and its visitors. This qualified trust service is provided by Evrotrust in accordance with Art. 45 of Regulation (EU) No 910/2014.

The types of profiles of Qualified Certificates for Website Authentication issued by Evrotrust are:

2.5.1. Evrotrust SSL PSD2 Certificate, OID: 1.3.6.1.4.1.47272.2.5.1

The issuance of such a certificate is a qualified trust service in accordance with Art. 45 of Regulation (EU) No 910/2014. It is issued for the purpose of authenticating a website related to a payment service provider under PSD2 and is intended to be used for fulfilling some requirements of PSD2. It is used to create certainty in a visitor that the website is maintained by a real and identified subject. Using this technology ensures reliable connectivity under a secure information exchange protocol.

2.5.2. Evrotrust SSL EV Certificate, OID: 1.3.6.1.4.1.47272.2.5

The issuance of such a certificate is a qualified trust service in accordance with Art. 45 of Regulation (EU) No 910/2014. It is used to create certainty in a user that the website is maintained by the real and identified subject specified in the certificate. During this certificate issuance an extended validation of the organization holding the website is performed.

2.5.3. Evrotrust SSL Organization Validated, OID: 1.3.6.1.4.1.47272.2.4.2

The issuance of such a certificate is a qualified trust service in accordance with Art. 45 of Regulation (EU) No 910/2014. This certificate attests to the authenticity of the website and confirms the existence of the organization shown as the Signatory of the website.

2.5.4. Evrotrust SSL Domain Validated Certificate, OID: 1.3.6.1.4.1.47272.2.4.1

The issuance of such a certificate is a qualified trust service in accordance with Art. 45 of Regulation (EU) No 910/2014. When issuing such a certificate, Evrotrust makes a check as to whether the registration and ownership of the domain in the public WhoIs databases corresponds to the person that requested it. If such public information is missing, the Subscriber provides information on their own which proves the ownership of the domain and is verified by Evrotrust.

2.6 ISSUANCE OF A QUALIFIED ELECTRONIC TIME STAMP, OID: 1.3.6.1.4.1.47272.1.2.1

The issued time stamps (TST) are assigned a unique object identifier: 1.3.6.1.4.1.47272.1.2.1. By including this object identifier in the issued electronic time stamp tokens, Evrotrust confirms compliance with the Evrotrust policy for providing qualified electronic time stamps with OID: 1.3.6.1.4.1.47272.1.2.

The issuance of a Qualified Electronic Time Stamp is a qualified trust service which Evrotrust provides in accordance with Art. 42 of Regulation (EU) No 910/2014. Qualified Electronic Time Stamps are issued to natural persons and legal entities. A Qualified Electronic Time Stamp enjoys the presumption of accuracy of the date and time that it indicates and of integrity of the data presented before Evrotrust. Such data may be an electronic signature, an electronic seal, a hash of unsigned electronic documents or a hash of some other electronic content.

The Qualified Electronic Time Stamp may be integrated in the process of creating, sending or accepting electronic signatures/ seals, electronically signed documents and electronic transactions, when archiving electronic data, etc. This service uses a technology of binding the date and time to the data in a way that excludes the possibility of an unnoticed change of the data and provides a possibility of proving, in a subsequent period of time (after the expiry of the validity period of the Qualified Electronic Time Stamp), the fact that an electronic document or another electronic item has been signed.

2.6.1 Specific Requirements Applicable to the Relying Parties

The main obligation of the Relying Party is to check the validity of the signature/ seal on the electronic time-stamp token (TST). The Relying Party must check the validity of the time stamp (TSU/ Time Stamp Unit) as well as the validity period of this certificate. If any time stamps are checked after the expiry of the validity period of the TSU certificate, the Relying Party must:

- (1) check for the time-stamp certificate in the Certificate Revocation List (CRL);
- (2) check the applicability of the hash algorithm used;
- (3) ascertain the security of the electronic signature used by checking the applicable combination of asymmetric and hash algorithms.

When relying on a Qualified Electronic Time Stamp the Relying Party is obliged to:

- (1) verify that the Qualified Electronic Time-Stamp has been correctly signed and that the private key used to sign the time-stamp has not been compromised until the time of the verification;
- (2) take into account any limitations on the usage of the time-stamp indicated by these Terms and Conditions and in the applicable Policies and Practices; and
- (3) take into account any other precautions prescribed in these Terms and Conditions and in the applicable Policies and Practices.

2.7 QUALIFIED VALIDATION SERVICE FOR QUALIFIED OR ADVANCED, BASED ON A QUALIFIED CERTIFICATE, ELECTRONIC SIGNATURES/ SEALS, OID: 1.3.6.1.4.1.47272.2.9

The Qualified Validation of a Qualified or Advanced, Based on a Qualified Certificate, Electronic Signature/ Seal is a qualified trust service in accordance with Art. 32, 32a, 33 and 40 of Regulation (EU) No 910/2014. This service is used to validate electronic signatures, electronic seals,

registered e-mail services and certificates related to those services and issued by Evrotrust. Validation is also made of qualified website authentication certificates. The qualified validation service is provided by Evrotrust in its capacity as a qualified trust services provider and as a result of its provision a special document certifying the validity is generated and given to the Subscriber.

In the process of validating a qualified or advanced, based on a qualified certificate, electronic signature/ seal, Evrotrust confirms the validity of the qualified or advanced, based on a qualified certificate, electronic signature/ seal in compliance with the requirements of Art. 32 and 32a of Regulation (EU) No 910/2014.

This service may be provided to validate qualified certificates for electronic signatures, seals and other qualified certificates issued by qualified trust service providers included in the trusted list of the European Commission. These trust services are provided in accordance with Art. 32a, 33 and Art. 40 of Regulation (EU) No 910/2014.

2.7.1. Specific Requirements Applicable to the Qualified Validation of a Qualified or Advanced, Based on a Qualified Certificate, Electronic Signature/ Seal Service. Accessibility and Service Level (SLA)

2.7.1.1. The qualified validation service accessible through Evrotrust's web page is intended for private, non-commercial use without any commitment of the part of Evrotrust as to its level of service. To use the service at the respective level of service or automated, it is necessary to conclude an additional contract under which the services may be provided automated through a relevant interface (API), which also regulates the offered service level (SLA). All specific conditions, formats and validation service algorithms used are described in the document *Policy and Practice of the Qualified Validation Service for Qualified Electronic Signatures/ Seals*.

The status for electronic signature/ seal validation and the document confirming or not the validity of the electronic signature/ seal (report) are related to the conformity Practices, Policies and arrangements of other service providers who are not controlled by Evrotrust. Therefore, there may be a delay in providing information about a certificate revocation status and a Subscriber/Relying Party may have to wait for the publishing of the respective Certificate Revocation List (CRL) by the respective provider and even for one more subsequent update of CRL to guarantee that each respective revocation request has been processed.

2.7.1.2. The service supports the following options:

- (1) The service allows the Subscriber to choose the Signed Data Object (SDO) and the Signer's Document (SD);
- (2) The service may allow the Subscriber to provide additional data about the validation process:
 - (a) the certificates that must be used for validation, e.g. the case when the SDO attributes do not contain the required certificates;
 - (b) the specific signature that must be checked in case SDO contains multiple signatures, and
 - (c) the policy to be used for the implicit or explicit validation of the signature.

2.7.1.3. Evrotrust supports signature formats determined in ETSI EN 319 122 - 1 and ETSI EN 319 122 - 2 or in ETSI EN 319 132 - 1 and ETSI EN 319 132 - 2 or in ETSI EN 319 142 - 1 and ETSI EN 319 142 - 2.

2.7.1.4. The types of formats with basic electronic signature/ seal profile which Evrotrust supports, are:

- (1) ETSI TS 103 171 Electronic Signatures and Infrastructures (ESI) - XadES Baseline Profile;
- (2) ETSI TS 103 173 Electronic Signatures and Infrastructures (ESI) - CadES Baseline Profile;
- (3) ETSI TS 103 172 Electronic Signatures and Infrastructures (ESI) - PadES Baseline Profile;
- (4) ETSI TS 103 174 Electronic Signatures and Infrastructures (ESI) - AsiC Baseline Profile

Additionally, Evrotrust validates the above formats but with an extended profile and levels:

- (1) ETSI TS 103 171 Electronic Signatures and Infrastructures (ESI) - XadES -T/TL Level;
- (2) ETSI TS 103 173 Electronic Signatures and Infrastructures (ESI) - CadES T/TL Level;
- (3) ETSI TS 103 172 Electronic Signatures and Infrastructures (ESI) PadES T/TL Level;
- (4) ETSI TS 103 174 Electronic Signatures and Infrastructures (ESI) AsiC T/TL Level.

2.7.1.5. Evrotrust's validation service validates the following electronic signature/ seal type formats:

- (1) Attached - Enveloping - the electronic signature/ seal envelops the signed item;
- (2) Attached - Enveloped - the signed item envelops the electronic signature/ seal;
- (3) Detached - the electronic signature is outside the signed item - in a separate file/ item; and
- (4) One document signed electronically with more than one electronic signature/ seal.

2.7.1.6. The service successfully validates electronic signatures/ seals with expired or outdated elements such as certificates with an expired validity period or time-stamps, coordinating the check with the certified date and time when the electronic signature/ seal was affixed. If no such time has been certified, the check is made as at the present time and if the validity of the elements has expired, this makes it impossible to confirm the validity of the signature/ seal, which is noted down in the validity report. When revoked certificates have been used, the service checks whether they were valid at the time of signing and, if not, the service notes down in the validity report that it is impossible to validate the signature. If an algorithm has been used outside its applicable period, the service notes down an electronic signature in the report as invalid for this reason.

2.7.1.7. Evrotrust chooses the validation limitations when the Subscriber provides a conflicting indication which contradicts Evrotrust's practice. Evrotrust does not allow the Subscriber to set a custom signature verification policy.

2.7.1.8. In its applicable Policies and Practices, Evrotrust indicates how it acts when it is impossible to process the limitations submitted by the Subscriber , under what conditions the Signature Verification Policy may be ignored and replaced with rules for validating the signature in accordance with the protocol specified in ETSI TS 119 442, which supports various options and specifies what is considered proof of existence (PoE) of a signature.

2.8 QUALIFIED ELECTRONIC REGISTERED DELIVERY

The Qualified Electronic Registered Delivery is a trust service allowing the transmission of data between third parties electronically and provides evidence with respect to the identity of the sender and the recipient of the transmitted data, the time of sending and receiving the data and protects the transmitted data against the risk of loss, theft, damage or unauthorized changes.

The service provides:

- (1) a high level of trust as regards the sender's identification;
- (2) the sender's identification before the delivery of the data;
- (3) The sending and receiving of data is secured through an advanced electronic signature or an advanced electronic seal of Evrotrust in a way excluding all possibilities for unnoticed change of the data;

- (4) Each data change necessary for the purpose of sending or receiving the data is clearly marked for the sender and for the recipient of the data;
- (5) The date and time of sending and receiving as well as any change of the data are indicated by a Qualified Electronic Time-Stamp.

When providing this service, Evrotrust creates, signs with an advanced electronic seal and gives to the sender proof (electronic advice of delivery) regarding the facts of the sending, receiving and integrity of the content transmitted.

This trust service of Evrotrust is provided in accordance with Art. 44 of Regulation (EU) No 910/2014.

The proof of the messages transmitted may be stored for a period of ten (10) years in Evrotrust's repository. It may be provided to the parties in accordance with the applicable prices and conditions.

The types of electronic registered delivery services provided by Evrotrust, are:

**2.8.1. Qualified electronic registered delivery service (QERDS), OID:
1.3.6.1.4.1.47272.2.10.1**

This service is provided by Evrotrust in accordance with Art. 44 of Regulation (EU) No 910/2014 and relies on technology that enables the delivery of electronic registered mail from a mobile application to a mobile application, from a mobile application to an API and back, and from a mobile application to a web page on a specialized portal and back.

**2.8.2. Qualified electronic registered delivery service (REM), OID:
1.3.6.1.4.1.47272.2.10.2 - qualified trust services**

This service is provided by Evrotrust in accordance with Art. 44 of Regulation (EU) No 910/2014 and relies on technology that enables the delivery of electronic registered mail via a specialized electronic mail server (SMTP) and is accessible through standard mail clients such as Mozilla Thunderbird , etc., as well as through the web based e-mail application.

2.8.3. Specific requirements for the provision of a qualified electronic registered delivery service

2.8.3.1. Successful delivery of electronic content

- (1) A successful sending shall be considered to have taken place where the content sent by the sender has left the information system of the sender and is no longer under their control.
- (2) A successful delivery shall be considered to have taken place where the content sent by the sender has successfully entered the information system of the recipient.
- (3) When using Evrotrust's mobile application, successful sending of content shall be considered to have taken place when the content has entered Evrotrust's backend (server), and successful delivery of content shall be considered to have taken place when the content has entered into the recipient's mobile application.
- (4) When using API integration, successful sending shall be considered to have taken place when the content has entered Evrotrust's backend (server) through the built API interface, and successful delivery shall be considered to have taken place when the content has entered into the recipient's information system through such interface.
- (5) When using a web-based portal, successful sending shall be considered to have taken place when the content has left the web browser of the Subscriber using the portal, and has entered Evrotrust's backend (server), and successful delivery shall be considered to have taken place when the content has entered the virtual mailbox accessible within the recipient's account through the web-based portal.
- (6) When using the qualified REM service, successful sending shall be considered to have taken place when the content has entered the information system of Evrotrust's electronic mail server (backend), and successful delivery shall be considered to have taken place when the content has entered the electronic mailbox serviced by the Evrotrust electronic mail server.

2.8.3.2. Evrotrust makes sure that the service protects the electronic content being transmitted against loss, theft, breach of integrity or unauthorized alteration and meets the requirements of Regulation (EU) No 910/2014.

2.8.3.3. The period of time during which the sent electronic content is available and the electronic registered mail system is making attempts to deliver it shall be set in advance by the sender. Should the sender fail to select an option, then such period shall by default be equal to three (3) days.

2.9 QUALIFIED PRESERVATION OF QUALIFIED ELECTRONIC SIGNATURES/SEALS AND/OR ELECTRONICALLY SIGNED/SEALED ELECTRONIC DOCUMENTS (QUALIFIED PRESERVATION SERVICE FOR QUALIFIED ELECTRONIC SIGNATURES AND FOR QUALIFIED ELECTRONIC SEALS), OID: 1.3.6.1.4.1.47272.2.13

The Qualified Preservation Service for Qualified Electronic Signatures and the Qualified Preservation Service for Qualified Electronic Seals are provided by Evrotrust in accordance with Art. 34 and Art. 40 of Regulation (EU) No 910/2014.

These trust services provide for secure and reliable long-term preservation of any type of electronic signatures and seals affixed to documents (without storing the documents themselves in a depository) and/or electronically signed/sealed documents (with a depository) of Subscribers of the service, and provides evidence of the preservation process, with the possibility to validate the electronic signatures/seals in the long run. In the provision of those services, Evrotrust shall fulfil requirements related to the procedures and technologies used that are capable of extending the reliability of the qualified electronic signature/seal beyond the period of its technological validity. These requirements are set out in applicable standards, for which Evrotrust has been certified by an independent conformity assessment body.

Data objects, the relevant storage evidence and additional information required for their validation can be accessed by using the service interface or by making a specific request for the provision of data and/or evidence. They can be provided separately or in an I/O (input/output) package that is reliably protected by encryption. In any case, they shall only be transmitted to either the Subscriber or their authorized representative. Evrotrust maintains information on all prepared I/O packages, including the date of the event and the criterion under which the stored objects included in the package have been selected. The request must indicate the person requesting the data, the reasons for requesting it and the method in which it wishes to receive it, for example, by e-mail or on an electronic medium. Evrotrust reserves the right to approve or refuse the execution of the request, without being required to motivate its refusal, or to notify the requester thereof, except in the cases specified in a legislative act. Evrotrust does not use any external organizations supporting the preservation service. At the end of the data preservation period, the data will be deleted.

2.9.1. Specific requirements for the provision of a qualified preservation service for qualified electronic signatures/seals

(1) The qualified preservation service keeps a preservation schemas and profiles which are related to the evidence generation and validation policies, as well as the extension of the period of validity and the validation of signatures. The preservation schemas and profiles has identifiers that uniquely identifies them.

(2) Evrotrust QPSES maintains the following preservation profiles:

- a. Qualified preservation service profile for any documents/data (F2.1) under a preservation scheme with temporary storage based on an archival time assertion (F2).
- b. Qualified preservation service profile on SHA-512 for any documents/data (F2.2) under a preservation scheme with temporary storage based on an archival time assertion (F2).
- c. Qualified preservation service profile for electronically signed/sealed documents (F3.1) under a preservation scheme with extension of the reliability of electronic signatures/seals and with storage(F3).

(3) With regard to the use of the stated trust services, Subscribers shall, among the other obligations provided for in these General Terms and Conditions, have the following specific obligations and responsibilities:

- a. to get acquainted with and observe the terms and conditions of the applicable Policies and Practices, as well as the requirements set out in the other documents published in the Evrotrust's website;
- b. to use the qualified preservation service only for lawful purposes and in accordance with the Policy and Practice determined therefor;
- c. to approve the terms and conditions set out in these General Terms and Conditions, which constitute the contract between them and Evrotrust. These General Terms and Conditions indicate who has the right to access the stored objects, including the sent data objects and evidence, and who has the right to monitor the actions related to the stored objects.

(4) Subscribers may submit a request for I/O packages by using an e-mail, an mobile application of Evrotrust, a web application or through physically visiting an office of a Registration Authority of Evrotrust.

(5) In case Evrotrust is unable to collect and verify all data for the validation of the accepted document and the evidence, Evrotrust will send an indication of a failed operation.

- (6) When the person, that is using the service, provides hash values which might be used in a hash-tree-renewal, Evrotrust is not liable for guaranteeing that the new hash values correspond to the original hash values of the hash tree. Evrotrust has no way of knowing to which document the hash values correspond and even if it really corresponds to a hash value of a concrete hash computation.
- (7) When the person, that is using the service, provides hash values of objects to preserve, and not the object itself, the preservation is only on the submitted objects and that this allows a proof of the existence of the hashed object only as long as the hash algorithm is strong enough.
- (8) The person that is using the service is not allowed to take a role in the preservation process (e.g. providing needed validation data).
- (9) The supported preservation service policies are described in detail the applicable Policies and Practices.

2.10 ELECTRONIC IDENTIFICATION SERVICE - EID

The electronic identification service is registered with object identifier OID: 1.3.6.1.4.1.47272.2.16.17.3. The service is qualified at the national level and is provided in accordance with Regulation (EU) No 910/2014. A Subscriber of the eID electronic identification service is the individual who identifies themselves, regardless of whether the fee for the provision of the service is paid by them or by the Relying Party. When providing the eID service, Evrotrust, on assignment by the Subscriber, creates a document with Subscriber's identification data in such volume as is necessary for the Subscriber's identification before a given Relying Party. The generated volume of identification data may include a copy of the Subscriber's identity document and other graphic elements (photograph, specimen, etc.) . The identification data is provided either in a standardized format with structured content (e.g. JSON), authenticated with a qualified time certificate, or as a hybrid document with structured and unstructured content (e.g. PDF + XML). In the second case, the provision of the eID service also includes the generation of a pair of cryptographic keys for a qualified electronic signature and the issuance of a short-term attributive QESQC under item 2.1.2, whereby the Subscriber signs the generated electronic identification document. The short-term attributive QESQC issued under item 2.1.2 whereby the Subscriber signs the generated electronic document contains all personal data which Evrotrust has made sure to be up-to-date and has verified using legally permissible means under Regulation (EU) No

910/2014. By the short-term attributive QESQC issued, the document for self-declaration of circumstances by the Subscriber is signed remotely. It serves only for the purposes of identification, insofar as the attributive QESQC binds Evrotrust with responsibility for the validity of the circumstances entered therein. The Attribute QESQC issued may also be used for signing the contractual documentation of Evrotrust for the provision of this service (these General Terms and Conditions and the applicable Privacy policy of Evrotrust).

The electronic identification (eID) service may also be provided within the framework of a notified electronic identification scheme of the Republic of Bulgaria pursuant to Art. 8 of Regulation (EU) No 910/2014. When provided as a notified scheme, the service includes sending part of the data in SAML format to the national center (node) of the Republic of Bulgaria – part of the European network for the exchange of information under notified schemes pursuant to the Regulation. In these cases, the minimum amount of data sent in SAML format includes personal name, surname, date of birth and personal identifier (e.g. personal identification number). Optionally, all or some of the following data may also be included: birth first name, birth surname, place of birth, current address, gender and others in accordance with the applicable requirements.

2.11 WEB INTERFACE ELECTRONIC IDENTIFICATION SERVICE - WEBID

The web interface electronic identification service is registered with object identifier OID: 1.3.6.1.4.1.47272.2.16.17.4. The service is qualified at the national level and is provided in accordance with Regulation (EU) No 910/2014.

A Subscriber of the WebID electronic identification service is the natural person who identifies themselves, including a natural person who is a representative of a legal entity, regardless of whether the price for providing the service is paid by the person or by the Relying Party. When providing the WebID service, Evrotrust, upon assignment by the Subscriber, collects identification data provided by the Subscriber in a volume necessary for the identification of the Subscriber before a specific Relying Party and verifies with legally permissible means in accordance with Regulation (EU) No. 910/2014 the up-to-dateness and the accuracy of the data. The provision of the WebID service includes the provision of the collected and verified identification data of the Subscriber to the relevant Relying Party, for which this is requested by the Subscriber, in a standardized machine-readable form as a document (file) with structured content through an established connection via API.

The conclusion of a contract for the provision of the WebID service is carried out in accordance with the provisions of item 6.3 of these General Terms and Conditions.

2.12 ELECTRONIC AUTHENTICATION

A Subscriber of the electronic authentication service is the individual identifying itself before the Relying Party, regardless of whether the fee for the provision of the service is paid by itself or by the Relying Party. When providing the electronic authentication service, Evrotrust, on assignment by the Subscriber, generates a document with structured content containing identification data of the Subscriber in such volume as is necessary for the Subscriber's identification before a given Relying Party for the needs of the Subscriber's access to specific content provided by the latter, and the so generated document is then sent to the Relying Party without being signed.

2.13 QUALIFIED ELECTRONIC ATTESTATION OF ATTRIBUTES SERVICE

The Qualified Electronic Attestation of Attributes (QEAA) Service is a qualified trust service defined under Article 3 (45) Regulation (EU) Nr. 910/2014 and provided by Evrotrust in accordance with the requirements of Article 45d of the same Regulation. Evrotrust issues QEAs to natural and legal persons in accordance with Evrotrust's Qualified Electronic Attestation of Attributes Policy.

A QEAA binds the attributes being attested to a specific identified natural or legal person in a way securing that the respective attribute pertains to that person. Before issuing the QEAA, the identity of the person is verified by appropriate means in accordance with applicable law, and the requested attributes are verified against relevant evidence and, where applicable and available, authentic sources. Each QEAA is signed or sealed by Evrotrust as provider of the service.

Users may use the QEAA service to demonstrate certain attributes of theirs before Relying Parties of their choice. For example, a natural person acting with representative power may request a QEAA that attests their representative capacity or other attributes relevant to acting on behalf of a legal entity. QEAs may be used together with a qualified electronic signature or qualified electronic seal, but the legal effects and validation rules for the signature/seal and the attestation remain separate.

Before trusting a QEAA Relying Parties must validate the QEAA in accordance with Evrotrust's QEAA Policy and the published validation information, including any status checking

mechanisms, and take into account any applicable limitations and intended-purpose statements associated with the QEAA. Relying Parties must process any personal data received through QEAA's in accordance with applicable law and limit retention thereof to what is necessary for the relevant purpose. Evrotrust publishes the information necessary for relying parties to perform validation and status checking in accordance with its QEAA Policy.

2.14 BASIC SIGNATURE

Basic Signature is a non-qualified service of Evrotrust for creating an electronic signature within the meaning of Art. 3, item 10 of Regulation (EU) No 910/2014, which enables Subscribers – individuals and individuals representing legal entities – to sign by adding or logically linking data in electronic form to other data in electronic form. Specifically, the service enables individuals to determine certain identifying information and attach it to certain content (e.g. an electronic document) and thus certify/sign this content electronically (e.g. to express their consent, to conclude a contract, to sign a declaration, etc.) in a flexible and simplified manner. According to the provisions of the applicable legislation, in order for the electronic signature thus created to produce a legal effect equivalent to a handwritten signature, it is necessary to have the consent of the parties. The presence or absence of such consent, respectively of such legal value of the electronic signature placed through the Basic Signature service, is beyond the knowledge and control of Evrotrust. Evrotrust sends the Subscriber a written confirmation, stamped with a qualified electronic seal of Evrotrust and information about the signatures placed by the Subscriber through the Basic Signature service.

The conclusion of a contract for the provision of the Basic Signature service is carried out in accordance with the provisions of item 6.3.1 of these General Terms and Conditions.

2.15 SERVICE FOR AUTOMATED CREATION OF QUALIFIED ELECTRONIC SIGNATURE/SEAL

Evrotrust provides the Subscriber with the opportunity to place electronic seals and create electronic signatures automatically, accompanied by certificates issued to the Subscriber for signing with a qualified electronic signature or for placing a qualified electronic seal. For this purpose, Evrotrust provides the Subscriber and persons authorized by the Subscriber with access to the web-based portal 'Evrotrust Corporate eSign' (the Portal). Access to the Portal is provided

only for the purposes of using and managing the service for automated creation of a qualified electronic seal, respectively qualified signature, and only for the term agreed between Evrotrust and the Subscriber or a Relying Party on whose behalf the Subscriber will perform automated signing.

All intellectual property rights to the Portal and its elements belong to Evrotrust. The Subscriber, the Relying Party and their employees and representatives are not entitled to provide the use of the Portal to third parties and may use it only as agreed with Evrotrust and as necessary for the use and management of the service and according to the options provided in the Portal's user interface.

2. LIMITATIONS IN THE USE OF THE PROVIDED SERVICES

The Subscriber undertakes to take all necessary actions in order to minimize and limit the damages resulting from the use of the services exceeding the limitations on their use as specified in these General Terms and Conditions or relevant Policies and Practices. Relying Parties agree and undertake to take all necessary actions, when relying on an electronic identification service or a trust service provided by Evrotrust, to keep track of and observe the limitations on the use of the services as set out in these General Terms and Conditions or relevant Policies and Practices.

3.1 TIME LIMITS

Each certificate issued by Evrotrust may only be used until the expiry of its validity. The period of validity of the certificates is entered therein.

Where a certificate has been cancelled, the Signatory /Creator shall not use the private key to create an electronic signature/seal.

3.2 INTENDED PURPOSE

Certificates issued by Evrotrust shall be used in accordance with their intended purpose as described in these General Terms and Conditions, in the applicable Evrotrust Policies and Practices and in the applicable law.

The verification of the intended purpose of a certificate shall be performed based on the following data contained in the certificate profile:

- (1) Policy/Practice in accordance with which an electronic signature/seal certificate is issued and

managed, as specified in the "Certificate Policies" field;

(2) the intended purpose and limits on the effect of the certificate with respect to the purposes for which it is used, as described in the "Key Usage" and "Extended Key Usage" fields;

(3) details of the Certificate Signatory /Creator, as specified in the "Subject" field.

3.3 TRANSACTION VALUE

The issued qualified certificates for qualified electronic signature are normally intended to be used for transactions worth up to twenty thousand euros (EUR 20,000) and those for qualified electronic seal – up to two thousand euros (EUR 2,000), unless a certificate stating a higher or lower value of the transactions has been issued. The issued qualified certificates for advanced electronic signature/ seal are intended to be used for transactions worth up to five hundred euros (EUR 500), or other noted in the certificate. The same limit applies to certificates for advanced electronic signature under item 2.2 of these General Terms and Conditions (AES). The applicable limits on the value of the transactions for which the issued qualified electronic signature/seal certificate is intended to be used shall be recorded in the „id-etsi-qcs-QcLimitValue“ attribute/field in accordance with the requirements of ETSI EN 319 412-5 and may be verified by each Relying Party. Evrotrust shall not be liable for any damages resulting from the use of qualified electronic signature/seal certificates issued by it for transactions exceeding the stated transaction value limits. The risk associated with the acceptance of electronic documents signed with qualified electronic signatures/accompanied by electronic seal certificates, with a material value exceeding the transaction value limits stated in the certificate, shall be entirely borne by the Relying Party. For services that do not include the issuance of a qualified electronic signature/seal certificate, the applicable limit is up to five thousand euros (EUR 5,000), unless otherwise specified in these General Terms and Conditions or the applicable Policy and/or Practice for the relevant service.

4 SPECIFIC CONDITIONS FOR QUALIFIED TRUST SERVICES ISSUANCE

4.1 ACCEPTANCE OF A CERTIFICATE

4.1.1. Upon receipt of a qualified certificate, the Subscriber shall be obliged to verify its content with regard to the accuracy of the data and the existence of a public key corresponding to the private key it holds.

4.1.2. If any incorrect data has been entered in the certificate, the certificate shall be immediately cancelled. If the Subscriber objects that the issued qualified certificate contains errors or omissions within 3 (three) days from its publication in the certificate repository, Evrotrust will remove them by issuing a new certificate at no cost, unless they come as the result of the provision of incorrect data, in which case the issuance of a new certificate is subject to a fee. If no objection has been made, the content of the certificate shall be deemed to have been accepted. The rules contained in this item shall apply both to the issuance of a certificate and to the renewal of a certificate. In case of remote issuance of a certificate through a mobile application of Evrotrust, if the Subscriber finds any inaccuracies in the data entered, it may at any time activate the functionality for cancellation of the certificate and for immediate issuance of a new certificate free of charge.

4.1.3. A qualified certificate shall be considered to have been accepted by the Subscriber in the event of any of the following:

- (1) Explicit approval/confirmation by the Subscriber;
- (2) The qualified certificate has been used for the first time by the Subscriber; or
- (3) Expiry of three (3) days as of the date of issuance of the qualified certificate, if within said period the Subscriber has not made an objection regarding the content of the certificate.

4.1.4. In the case of certificates of electronic signature, or electronic seal respectively, the obligation under item 4.1.1, the possibility of objection under item 4.1.2, and the prerequisites under which the certificate is considered to have been accepted under item 4.1.3, shall at all times apply only in respect of the Signatory, or the Creator respectively, regardless of whether the issuance of the certificate itself is paid by them or by a third party (another Subscriber) which has also entered into a contractual relationship with Evrotrust under these General Terms and Conditions.

4.2. PERIOD OF STORAGE OF CONTRACTS AND OF ANY OTHER INFORMATION RELATED TO THE IDENTIFICATION OF THE SIGNATORY/CREATOR/SUBSCRIBER

All information relevant to and all data created or received by Evrotrust in relation to the process

of Subscriber identification and registration and/or the conclusion of a contract under these General Terms and Conditions for the provision of trust services (incl. evidence of the conclusion thereof and of the acceptance of the General Terms and Conditions) will be recorded and stored by Evrotrust for the entire period of validity of the respective contract and for a period of 10 (ten) years after the termination thereof. In addition, information on each certificate issued, cancelled and revoked by Evrotrust will be stored for the same time period, and this period shall commence as from the revocation of the certificate. The same period shall also apply to information created or received by Evrotrust in relation to the process of provision of validation services, qualified e-mail, qualified signature/seal storage, electronic identification and electronic authentication, including logs for all events associated with the issuance, effect and validity of the keys, incl. information on each generated key pair. Such information will be stored for the period specified herein, including after Evrotrust has ceased its activities. Such information is stored in order for Evrotrust to fulfil its legal obligations under Art. 24 (2) (h) of Regulation (EU) No 910/2014 and the standards applicable to its activities, and with the purpose of providing evidence in legal proceedings and ensuring continuity in the provision of the service.

5 SUBSCRIBER, SIGNATORY, CREATOR AND RELYING PARTIES

5.1 SUBSCRIBERS

5.1.1. A Subscriber is an individual or legal entity that is bound by a contract with Evrotrust, whereunder Evrotrust provides it with trust services. A Subscriber may also be a person other than a Signatory of electronic signature/Creator of seal, however the conclusion of a contract with Evrotrust under these General Terms and Conditions is a mandatory condition for each Signatory of electronic signature/Creator of seal for the issuance of a certificate by Evrotrust. The Subscriber may act on behalf of one or more different Signatories/Creators with whom it is affiliated (e.g. a legal entity that pays for the issuance of electronic signature certificates for its employees). The Subscriber may not be stated in the data entered in the issued certificate. The Subscriber may also be a person who, for example, uses a trust service of Evrotrust such as time-stamp.

In cases where the Subscriber is a person other than the Signatory (e.g. one person requests services in favor of other persons), the Subscriber shall accept these General Terms and Conditions, but at the same time, it shall also enter into a contract containing additional individual arrangements with Evrotrust. In such cases:

1. identification of the Signatory shall be made in a way that does not differ from the way in which such persons are identified when they are the sole Subscribers and directly enter into contractual relationships with Evrotrust;
2. both the Subscriber and the Signatory/Creator shall enter into a contract with Evrotrust under these General Terms and Conditions.

5.1.2. Signatory of an Electronic Signature/Signatory is the individual creating the electronic signature. Details about the Signatory shall be entered in the electronic signature certificate.

5.1.3. Creator of a seal/Creator is a legal entity creating an electronic seal. Details about the Creator of a seal shall be entered in the electronic seal certificate.

5.1.4. Signatory/Creator is the person indicated in the certificate as the Signatory of the private key associated with the public key (Subject within the meaning of ETSI EN 319 411-1 V1.2.2 (2018-04)).

5.1.5. Relying Party means an individual or legal entity who relies on electronic identification or a trust service provided by Evrotrust.

5.2 SIGNATORY OF ELECTRONIC SIGNATURE

Through an issued electronic signature certificate, a Signatory may make, on their own behalf or on behalf of another person it represents, electronic statements which it signs electronically, in accordance with the representative power vested in it. The electronic signature certificate may also indicate the person represented by the Signatory. Only the Signatory stated in the certificate shall have the right to access the private key through which it creates an advanced or qualified electronic signature.

5.3 CREATOR OF AN ELECTRONIC SEAL

A Creator may sign electronic objects, regardless of their nature (software, photographs, music, films, books, architectural projects, databases, design, etc.), thereby declaring that it is the legitimate source of such electronic object, as well as that the object has intact integrity. An electronic seal does not guarantee the Creator any rights over the electronic object (copyright

and others). A legal entity Creator of an electronic seal shall be entered in the issued electronic seal certificate as the Creator. Only empowered persons designated by the Creator entered in the certificate shall have the right to access the private key for signing electronic statements through which an advanced or qualified electronic seal is created.

5.4 RELYING PARTIES

5.4.1. Relying Parties shall have knowledge and skills regarding the use of a qualified certificate and rely on the certified circumstances therein only in view of the applicable Policies and Practices, especially with regard to the level of certainty when verifying the identity of the Signatories and the identity of the Creators of such qualified certificates, as well as with regard to the limitations on its use as stated in the certificate.

5.4.2. The Relying Parties shall have permanent access to the Evrotrust registers to verify the validity of qualified certificates or other circumstances and data reflected in the certificates or entered in those registers.

5.4.3. Due care by Relying Parties

5.4.3.1. Each Relying Party shall take due care, by:

- (1) relying on a certificate only in view of its intended purpose and the limitations under which it was issued, in accordance with the applicable Evrotrust Policies and Practices, the information entered in the certificate itself and the provisions of these General Terms and Conditions;
- (2) verifying the status of the certificate by using online certificate status protocol (OCSP) service maintained by Evrotrust. A verification of the electronic authenticity and integrity of the certificate outside the OCSP service or in an outdated Certificate Revocation List (CRL) does not provide verification of its validity and all damages caused by actions taken after such verification only shall be borne by the Relying Party;
- (3) verifying the validity of the electronic signature/seal of electronically signed statements, as well as the validity of the electronic signature of Evrotrust along the certificate chain up to the base certificate;
- (4) making sure that the applications using the certificate are functionally applicable for the

purpose for which it was issued, and in view of the level of security, as set out in the relevant Policies and Practices;

(5) verifying that the signature/seal accompanied by the certificate has not been used for the purposes and for the value of transactions beyond the limits and purposes stated in the certificate;

(6) making sure that the length of the keys used meets the security requirements of the Relying Party;

(7) making sure that the certificate was valid at the time of creation of the electronic signature/seal.

(8) when trusting identification data obtained as a result of a remote electronic identification service - eID or WebID provided to a Subscriber, verifying the information about the source and the performed verification of the received data, when such information is available, and based on it to carry out an independent assessment of the level of risk of the remote identification, in accordance with the applicable requirements for its activity.

5.4.3.2. The Relying Party's due care is expressed in their using a mechanism for secure verification of an electronic signature/seal, which ensures that:

(1) the public key used to verify the signature/seal corresponds to the one produced before it;

(2) the verification for the use of the private key has been reliably confirmed and the results of such verification are correctly presented;

(3) where necessary, the content of the signed electronic document may be established;

(4) the authenticity and validity of the certificate at the time of signing are reliably confirmed;

(5) the results of the verification and the electronic identity of the Signatory/Creator are correctly presented;

(6) any security-relevant changes are detectable.

5.4.3.3. Evrotrust shall not be liable for any damages incurred by the Relying Party due to failure to exercise due care.

5.4.4. Verification of certificates

The verification of electronic signature and electronic seal certificates issued by Evrotrust is performed using the status verification services and the Certificate Revocation Lists kept by Evrotrust. The verification of time stamps certificates is performed by verifying their compliance with the standard under which they were issued. All electronically signed documents, including

validation reports, can be verified using the validation service provided by Evrotrust. The Evrotrust system used for validation of qualified electronic signatures/seals provides the Relying Parties with the correct result of the validation process and allows them to detect any issues related to the security and validity of the certifications.

Each Relying Party, upon receipt of an electronic document signed with a qualified electronic signature/seal by a Signatory/Creator, shall verify the status of the qualified certificate in the current Certificate Revocation List (CRL) or by a verification of the current status of the certificate in real time (OCSP) or through a qualified electronic signature/seal validation service provided by Evrotrust. For the avoidance of doubt, the certificates issued by Evrotrust contain a period of validity which a Relying Party must always comply with before relying thereon. A Relying Party shall only rely on a certificate until it is cancelled. A Relying Party shall not rely on a certificate where the signature/seal was created at a time the certificate had been cancelled. Each document bearing a defective or suspicious electronic signature/seal shall be rejected or possibly subjected to further procedures that allow for its validity to be indicated. The Relying Party shall also take all other precautionary measures as provided for in these General Terms and Conditions or in any other applicable Evrotrust document. Any person who approves such a document shall be responsible for any consequences resulting thereafter.

An update of the current Certificate Revocation List (CRL) shall be automatically done not later than every 3 (three) hours or immediately after the cancellation or revocation/renewal of a valid certificate. In all Certificate Revocation Lists (CRLs) Evrotrust indicates the time for the next issue. The effective period of validity of the current published List is indicated therein. Evrotrust keeps in its Certificate Revocation Lists information about all the revoked certificates issued by the respective certification authority regardless of their validity period. Evrotrust CRLs include the X.509 „ExpiredCertsOnCRL“ extension as defined in ISO/IEC 9594-8/Recommendation ITU-T X.509. Evrotrust shall not issue a last CRL until all certificates in the scope of the CRL are either expired or revoked.

Any Relying Party, upon accepting a qualified certificate, may request a real-time certificate status verification using the OCSP (On-line Certificate Status Protocol) service. Such verification, unless a real-time update of the qualifying certificate status is done, is not mandatory for the Relying Parties. However Evrotrust recommends using this OCSP service. To achieve higher security when using electronic signatures/seals, it is recommended to integrate the service in the process of

creating or accepting electronically signed documents. The OCSP service must be provided by Evrotrust.

5.4.5. In case of breach of the security of the private key (its disclosure) of the Certification Authority or other entities operating within Evrotrust, Evrotrust shall immediately inform the Relying Parties by publishing information on its website.

5.4.6. The Evrotrust public keys are published in the certificates of the Evrotrust Certification Authority in X.509 v.3 format. The certificates are published in the certificate repository and accessible via the Evrotrust's website at: <https://www.evrotrust.com>. Each Relying Party builds trust in Evrotrust by accepting and installing within the systems under their control the operational certificates of Evrotrust.

5.4.7. Evrotrust maintains certificate repository (where it publishes the certificates it uses in its activity as a trust service provider, the issued certificates and the certificate revocation list.

5.4.8. Evrotrust shall not be liable for any damages caused by the failure of a Relying Party to comply with the requirements set out in these General Terms and Conditions. Evrotrust's relations with the Relying Parties shall be governed by the common tort law in accordance with the applicable law.

6 WAYS TO REQUEST A SERVICE AND CONCLUDE A CONTRACT WITH EVROTRUST

Evrotrust shall provide, either free of charge or for a fee, the services covered by these General Terms and Conditions, subject to and in strict compliance by the Subscriber/Signatory/Creator of the contract entered into under these General Terms and Conditions, as well as the applicable law. The services are diverse, constantly supplemented and modified with a view to their improvement and expansion and on this basis, their number, characteristics and the conditions for their provision may be unilaterally changed at any time by Evrotrust within the limits provided by the applicable law.

The services of Evrotrust may be requested and, respectively, provided in different ways depending on their nature and in accordance with these General Terms and Conditions. The

requesting of a service and the conclusion of a contract requires the Subscriber's secure identification in accordance with the level of security required for the specific service and the Subscriber's acceptance of these General Terms and Conditions. Before requesting a service, the Subscriber shall get acquainted with all the Policies and Practices applicable to the relevant service. Upon requesting a service, the Subscriber accepts these General Terms and Conditions. Where Evrotrust has reason to believe that a Subscriber/Signatory who is a natural person does not have full legal capacity to enter into a contract or use relevant services under these General Terms and Conditions, Evrotrust may refuse, suspend or condition the provision of services upon the prior completion of additional verification steps and provision of information, consents, approvals, representations or documents required under applicable law to allow it. This may include consent, approval or other action of a parent, legal guardian, holder of parental responsibility, or other duly authorised person, as well as verification of that person's identity, authority and relationship to the Subscriber or Signatory.

The different services of Evrotrust may be requested in different ways and not every way of requesting provides an opportunity to request each of the services. Up-to-date information on how the various services of Evrotrust can be requested and used is contained in these General Terms and Conditions, on the Evrotrust website or in the relevant other information resources or channels for access to the company's services.

Evrotrust services may be requested in the following ways:

6.1. IN PERSON AT AN EVROTRUST OFFICE

The procedure for requesting a trust service in an Evrotrust office requires the Subscriber's physical presence, in cases where the Subscriber is an individual, or respectively the presence of a legal representative or a proxy duly authorized by a notarized power of attorney, in cases where the Subscriber is a legal entity.

6.1.1. By a Subscriber - Natural Person

The Subscriber shall provide the following information for unambiguous identification and verification of their identity: Full name (as in the identity document); identity document - personal

ID card, international passport or other identity document; National Identification Number, if any; contact details - mobile phone number, e-mail address and postal address. A copy of the identity document will not be taken. After successful verification of the Subscriber's identity, an authorized operator from the Evrotrust internal Registration Authority will:

- (1) propose a contract for qualified trust services signed on behalf of Evrotrust, and keep all submitted documents relating to the contract. The contract will be signed by the Subscriber on paper.
- (2) confirm the request for issuance and send an electronic request for the issuance of a certificate to the Evrotrust operational Certification Authority;
- (3) record the issued certificate on a Secure Signature Creation Device (QSCD) and transmit it to the Signatory or to the authorized person (if applicable).

6.1.2. By a Subscriber - Legal Entity

The establishment of the identity of a legal entity is performed by the Registration Authority, through a verification in the relevant registers based on a provided registration or other unique identification number of the legal entity. The identification of legal entities and the verification of the representative power is performed on site on the basis of information provided by the Subscriber through automated remote identification. In such identification, all data that will be entered in the issued certificate, as well as the legal representative power of the person who appeared in the office of Evrotrust, as well as the identity of the natural person representing the legal entity in the manner specified in the previous item, are verified in real time.

For legal entities for which an automated verification cannot be performed, the following shall be submitted:

- (1) Court decision or other document(s) certifying the establishment of the legal entity;
- (2) Document certifying the entity's good standing;
- (3) Unique national identification number;
- (4) Other relevant documents.

After copying all the required documents, with the consent of the person who submitted the request, the copies remain in the Evrotrust records. For the avoidance of doubt, such consent shall not constitute consent under Regulation (EU) No 679/2016, but rather a contractual consent and shall be a mandatory condition for the conclusion of the contract. The certification of the

information contained in the documents submitted shall be performed by 'True to the original' certification and handwritten signature affixed on the documents before an officer of the Registration Authority by the person representing the Subscriber, in case of personal delivery of the documents. The certification of the identity of a legal entity has three purposes: (1) verification of whether or not the legal entity exists at the time of reviewing the request, (2) verification of whether or not the person appearing on behalf of the legal entity has the necessary representative power to request the relevant trust services and to validly enter into the contract for the provision thereof under these General Terms and Conditions on behalf of the Subscriber, and (3) verification of the identity of the natural person appearing on behalf of the legal entity.

When identifying persons for whom certificates are issued for the purposes of fulfilling the requirements of PSD2, Evrotrust will verify the specific attributes which it receives from the person and which it enters in the certificates issued, by using authentic information from a National Competent Authority (NCA) (e.g. a public register). In the event that the NCA has established rules for the verification of such attributes, Evrotrust shall implement and apply them.

Evrotrust makes sure that individuals and legal entities are correctly identified, their identity is verified and that the requests for the issuance of qualified certificates are duly verified and approved, including the full name and legal status of the individual/legal entity concerned and the link between the certified data and the individual/legal entity.

6.2. VIA AN EXTERNAL REGISTRATION AUTHORITY OF EVROTRUST

The procedure for requesting a service and entering into a contract via an external Evrotrust Registration Authority may be performed:

1. in person upon personal appearance of the individual Subscriber or a legal representative or a duly authorized proxy of the legal entity Subscriber at an office of an external Registration Authority and the filing by the Subscriber of a request with the Registration Authority for the respective service; or
2. by using a mobile application or a web interface (website) (together - "an Electronic Channel") of the Registration Authority.

A request may be filed with an external Registration Authority of Evrotrust for any of the Evrotrust services in respect of which the relevant external Registration Authority is authorized to act as such. When the Client appears in person before the Registration Authority and if the contract is

concluded on paper, the service request procedure is carried out in the manner described in item 6.1. above.

Upon request for issuance of a qualified certificate for an advanced or qualified electronic signature, as well as of a non-qualified certificate for an advanced electronic signature before an external Registration Authority of Evrotrust:

(1) The Registration Authority will acquaint the Subscriber with the General Terms and Conditions under which the contract is to be concluded, the applicable Policies and Practices and the Privacy Policy of Evrotrust. Where the application for a short-term certificate is made through an Electronic Channel of the Registration Authority, the latter publishes in a prominent place in the relevant mobile application or web interface the General Terms and Conditions, the applicable Policies and Practices and the Personal Data Protection Policy or, respectively, electronic references (links) to them, in a way that allows the Subscriber to familiarize with these documents before requesting the service.

(2) Identification of the Subscriber is performed:

A. Upon personal appearance of the Subscriber before the Registration Authority: The Subscriber will present before the Registration Authority an identity document in order to be identified and to be issued the respective certificate. The Registration Authority will perform identification of the Subscriber by comparing the photograph from the produced identity document with the physically present person who appeared before the Registration Authority. In case there is a match between the photograph on the identity document and the physically present person, the Registration Authority will record, from the identity document produced by the Subscriber and enter in the Evrotrust information system, identification data related to the Subscriber: full name, unique identification number (if any) and/or the number of the identity document;

B. When requesting a service for issuing a short-term certificate through the Electronic Channel of a Registration Authority, it is necessary that the Subscriber has previously become a client of the external Registration Authority in the context of another service/ activity carried out by the Registration Authority (e.g. as a bank), in connection with which the Registration Authority has verified the identity of the Subscriber, and that there is continuity in the use of said other service/ activity in connection with which the Subscriber has been identified. The identification of the Subscriber in these cases is carried out in one of the following ways:

B1. based on an identity document, presented in its original, by the Subscriber through a personal appearance; or

B2. when requesting a service involving the issuance of a qualified certificate - through remote electronic identification that uses an identification method meeting the applicable requirements of Art. 24, Paras. 1, 1a and 1b of Regulation (EU) No 910/2014, including any method under item 6.5 below;

B3. only for services which do not include the issuance of a qualified certificate - through another method of remote electronic identification agreed between Evrotrust and the organization acting as an external Registration Authority, subject to the identification requirements applicable to the relevant service pursuant to Regulation (EU) No 910/2014 and the applicable national legislation. In these cases, the identification must include at least the provision to the Registration Authority by the Subscriber of their image (image of their face) and an image of their valid original identity document, and it is necessary that the connection between the image of the face, the image of the identity document and the person providing them to the Registration Authority be confirmed in a secure and unambiguous manner (e.g. through a real-time telephone conversation, answering control questions, etc.).

Evrotrust may apply a time limit established in the relevant regulatory Policy and Practice for the method of identification, after the expiration of which it may require a new pass through the identification process in order to allow the issuance of a certificate.

The Registration Authority provides the data collected by it during the verification of the Subscriber's identity to Evrotrust and guarantees their relevance and completeness.

(3) Based on the data submitted by the Registration Authority to Evrotrust's information system and dependent on the available connectivity, Evrotrust performs additional identification of the Subscriber, which may include verification in the databases of the official primary data controllers in the respective country (e.g. the databases of the authority that issued the identity document) of the correctness of the entered data, verification of the validity of the identity document produced before the Registration Authority, or other appropriate verification steps;

(4) In addition to the entered data, the Subscriber will provide, for the purposes of concluding the contract, details of their valid mobile phone number and (optionally) e-mail address which must be under their sole control. In cases where the service of issuing a short-term certificate is requested by the Subscriber through the Electronic Channel of the external Registration

Authority, the mobile phone number and (optionally) the e-mail address that the Subscriber has provided to the Registration Authority in connection with the use of the Registration Authority's other services (e.g. as a bank), are used. For the avoidance of doubt, a PIN code and/or a secret link for activation of and signing with the short-term certificate issued by Evrotrust will be sent to the mobile phone number designated by the Subscriber, and the contract signed by the Subscriber, as well as the applicable Evrotrust Privacy Policy and other applicable documents, if any, will be sent to the e-mail address designated by the Subscriber. In the absence of an e-mail address, the documents signed by the Subscriber are provided to the Subscriber in another appropriate way that allows their storage and reproduction.

In cases where the mobile phone number and e-mail address are provided by the Subscriber during their identification by the Registration Authority, the Subscriber bears full responsibility for their correctness, including for any risks associated with providing an invalid or incorrect mobile phone number or email address. In cases where the request for the service is made through the Electronic Channel of the Registration Authority, in the relationship with Evrotrust the responsibility for the correctness and up-to-dateness of the Subscriber mobile phone number and e-mail address rests with the Registration Authority.

(5) The Registration Authority will send to Evrotrust a request signed by it for the issuance of a short-term certificate and will confirm the performed identification of the Subscriber.

(6) Upon successful identification of the Subscriber Evrotrust will issue the requested short-term certificate in real time and will send via SMS to the mobile phone number designated by the Subscriber a PIN code and/or a secret link for activation of and signing with the issued certificate. For security reasons, the PIN code and the link for activation and signing will be valid and can be used for activation and signing purposes for a limited period of time only. Upon expiry of said period, the PIN code and the link for activation and signing can no longer be used and the requested short-term certificate will not be issued.

(7) The Subscriber will sign the contract by performing the respective actions described in this item 7. The Subscriber enters PIN code in the space/ field indicated by the Registration Authority, marking the appropriate field for acceptance of the General Terms and Conditions, the Policies and Practices and the other applicable documents, if any, and for confirmation that the Subscriber is familiar with the Evrotrust Privacy Policy. The Subscriber then presses a button for signing onto the Registration Authority's device in the Evrotrust information system or follows/ clicks on the

secret active link received in an SMS message sent to them. When the service is requested through an Electronic Channel of the Registration Authority, the contract is signed by the Subscriber by entering the PIN code in the relevant application or interface and by pressing a signing button in this application or interface.

By performing one of the actions referred to above, the Subscriber declares that they are familiar with the applicable Evrotrust Privacy Policy pursuant to which Evrotrust processes their personal data in relation to this contract, declares that it is familiar with and accepts these General Terms and Conditions and thus is entering into a contract with Evrotrust under these General Terms and Conditions for the requested service.

With the specified actions the Subscriber makes an electronic statement, representing a request for the issuance of a short-term certificate under the conditions of the specified documents. The parties agree that the data in electronic form attached to the statement under the previous sentence have the meaning of an electronic signature within the meaning of Art. 3 (10) of Regulation (EU) No 910/2014 and on the basis of Art. 13, para. 4 of the Electronic Document and Electronic Trust Services Act (EDETSA) agree that it will have the force of a handwritten signature in the relationship between them. The short-term certificate issued under this procedure is used to sign the General Terms and Conditions and the applicable Privacy Policy of Evrotrust, as well as the other documents applicable between the parties, if any. Upon signing these documents, the electronic statement for issuance of the certificate, together with the General Terms and Conditions, form the contract between Evrotrust and the Subscriber.

At the same time, the Subscriber also signs with the short-term certificate the documents of the Relying Party that have been submitted for signature by the Relying Party. Upon the Subscriber entering a PIN code or, respectively, clicking on the secret activation link and receiving a signed request from the Registration Authority, the short-term certificate will be activated and, through the Evrotrust information system, a request will be made by the Subscriber for the signing of the documents described above. Upon the said signing, the contract will be considered to have been entered into, and the requested services will be considered to have been fully provided. When performing this signing, the Subscriber uses a Service for Management of Remote Electronic Signature Creation Devices in accordance with these General Terms and Conditions. In case of refusal by the Subscriber to sign the contract with Evrotrust or, respectively, in case of refusal by or inability of (regardless of the reason why) the Subscriber to enter a PIN code or to click on the

activation link, the short-term certificate will not be issued. Evrotrust will immediately confirm the signing of the documents to the Subscriber.

(8) Evrotrust will immediately deliver (send) on behalf of the Subscriber the electronic documents signed by the Subscriber with the short-term certificate, intended for the Relying Party, to the latter.

6.3. REMOTELY VIA WEB INTERFACE FUNCTIONALITY OR THROUGH ANOTHER ELECTRONIC COMMUNICATION CHANNEL

For certain of its services, Evrotrust can provide the possibility for the Subscriber to conclude a contract by means of a functionality in a web interface, available independently or as a built-in functionality in an Electronic Channel (including mobile application) of a third party – Relying Party, or through another electronic communication channel (e.g. by receiving a message at the Subscriber's email address). In these cases, before requesting the use of the service, the Subscriber familiarizes with and accepts the current General Terms and other documents required by applicable law and gives their express consent by pressing the relevant electronic button in the provided interface/ electronic communication channel.

6.3.1. Subscriber Identification

6.3.1.1. Non-Qualified Services

When the services requested by the Subscriber are not qualified and do not include the issuance of a qualified certificate in accordance with Regulation (EU) No 910/2014, the identification of the Subscriber is carried out in compliance with the requirements applicable to the relevant service. In certain cases, this may be done by declaring the required information about the Subscriber in the relevant web interface/ electronic communication service or in another manner permitted by law. When declaring data, it is possible that the declaration may be made by a Subscriber in relation to another person or by a natural person acting on behalf of a Subscriber – a legal entity. The person providing the data is responsible for their accuracy and up-to-dateness, as well as for the existence of grounds for providing them to Evrotrust.

6.3.1.2. Qualified Trust Services

When the services requested for use by the Subscriber are qualified or include the issuance of a qualified certificate pursuant to Regulation (EU) N. 910/2014, the identification of the Subscriber for the purposes of concluding contract remotely through a web interface/ electronic communication channel is carried out by Evrotrust by applying the certified method of Evrotrust for remote identification - WebID, which meets the requirements of Art. 24, para. 1a (c) of Regulation (EU) No 910/2014 - an identification method which ensures the identification of the person with a high level of confidence, the conformity of which is confirmed by a conformity assessment body, or by another method permitted by Article 24, para. 1a of Regulation (EU) No 910/2014. The method is described in the document *Policy and practice in the provision of qualified service on a national level for electronic identification through a web interface*, an up-to-date version of which is published on the website of Evrotrust [here](#).

6.3.2. Conclusion of the Contract

By using the functionality provided in the relevant interface/ electronic communication channel, and the activation of a designated electronic button or link, the Subscriber makes an electronic statement to conclude a contract for the provision of the relevant service indicated in the provided interface/ electronic communication channel, under the conditions of the documents specified in the respective interface/ electronic communication channel, incl. these General Terms and Conditions. The Parties agree that the data in electronic form attached to the statement under the previous sentence have the character of an electronic signature within the meaning of Art. 3 (10) of Regulation (EU) No 910/2014, and on the basis of Art. 13, para. 4 EDETS agree that it will have the force of a handwritten signature in the relationship between them.

6.3.3. When the service requested according to the preceding paragraph is the issuance of a short-term certificate for electronic signature, Evrotrust may apply a time limit established in the document *Policy and Practice in the provision of qualified service on a national level for electronic identification through a web interface*, after the expiration of which Evrotrust may require the Subscriber to go through the identification process again, to provide the service.

The text of the General Terms and Conditions is provided to the Subscriber as described in item 1.4.5, para. (2) of these General Terms and Conditions.

For the issues not settled in this item 6.3 regarding the request for and the signing with short-term certificate through web interface functionality or through another electronic communication channel, the relevant texts of item 6.2 apply accordingly.

6.4. REMOTELY VIA MOBILE APPLICATION OF EVROTRUST

The process for requesting a trust service and concluding a contract via Evrotrust's mobile application is settled in Section 7 of these General Terms and Conditions.

6.5. OTHER

In addition to the ways described above, Evrotrust may conclude a contract with a Subscriber following the Subscriber's identification in another legally permissible manner, including, to the extent necessary, through one or a combination of the methods under Art. 24, para. 1a of Regulation (EU) No 910/2024, namely - through a European Digital Identity Wallet (EUDIW) or a notified electronic identification scheme with assurance level 'high', through a certificate for a qualified electronic signature or for a qualified electronic seal issued in accordance with letter a), c) or d) of Art. 24, para. 1a of Regulation (EU) No 910/2024, through an identification method which ensures the identification of the person with a high level of confidence, the conformity of which is confirmed by a conformity assessment body, or through the physical presence of the natural person or an authorized representative of the legal person by means of appropriate evidence and procedures, in accordance with national law.

The contract may be concluded remotely by signing a relevant document with a qualified or other electronic signature, or in another manner agreed upon between the parties and consistent with the applicable legislation.

7 EVROTRUST'S MOBILE APPLICATION

7.1 INSTALLATION OF THE EVROTRUST MOBILE APPLICATION

In order to use the services via the Evrotrust mobile application (**the Application/ the Mobile Application/ the Evrotrust mobile application**), the Subscriber shall agree in advance with these General Terms and Conditions and shall perform the steps described below:

(1) to have a device that enables the installation and normal operation of the respective version of the Evrotrust mobile application. The Mobile Application may require that the access to the

device used for its installation be secure and have functionality for access to the device through biometrics (e.g. fingerprint, facial recognition, and the like), or other mechanisms for additional protection;

to have ensured that the device used by it is connected to the Internet in a manner that enables it to use data transmission services at a speed that allows functional access to the Internet;

(2) to have ensured a device's connectivity to a mobile network in a manner that enables it to use mobile services, including the possibility to receive and send short text messages (SMS), IM messages, and e-mail;

(3) to have the latest updated version of the Evrotrust mobile application installed on the device and to keep the installation up to date.

7.2 CONTRACT CONCLUSION ACTIONS

7.2.1. After the mobile application has been installed and started on the device, the Subscriber will get acquainted with and accept these General Terms and Conditions, confirm that they have read the Evrotrust Privacy Policy and give their explicit consent to the processing of its biometric data and to decision making based on automated processing of personal data in accordance with the Declaration of Consent by pressing the appropriate button in the application for proceeding with the installation. By doing this, the Subscriber makes a request to Evrotrust to take action for the conclusion of a contract under these GTC, an integral part of which is a request for remote issuance of a QESQC.

7.2.2. By the actions under item 7.2.1, the Subscriber agrees that the communication with them will be executed through the e-mail address and mobile phone number indicated by them during the registration, including through IM messages through the mobile application and short text messages (SMS). Each successfully sent message to the indicated e-mail or mobile phone number will be considered duly served, without being necessary to confirm the receipt thereof. The successful sending of a message to the Subscriber through the mobile application will be considered secure and proper delivery of electronic registered mail within the meaning of Regulation (EU) No 910/2014.

7.3 REGISTRATION IN EVROTRUST MOBILE APPLICATION

The Subscriber's registration in the Evrotrust mobile application includes the following steps:

7.3.1. Security codes

7.3.1.1. To protect their Profile, the Subscriber selects a PIN code according to the instructions in the Application. The PIN code is secret and is not stored by Evrotrust in an unencrypted ('clean') form, nor is it stored in the Mobile Application. The Subscriber does not have the right to provide their PIN code to third parties. If they do so, all actions performed within the Mobile Application and the relevant statements made will be considered performed by the Subscriber, with the resulting binding legal consequences.

7.3.1.2. Within the Evrotrust mobile application, depending on the supported functionality of the device on which the mobile application is installed, as well as the software functionalities developed by Evrotrust, biometric data of the Subscriber can be linked to the PIN code - fingerprint, face shape, etc.

In the presence of appropriate functionality, instead of a PIN, the system can provide creation of a biometric face map based on the unique features of the face. In this case, a specialized solution integrated into the mobile application is used to activate it. The use of said solution may be requested by Evrotrust or a Relying Party as a mandatory condition for using a service, including signing or sealing a document.

The Subscriber's biometric data remain under their control at all times, solely within their device and the installed application. Evrotrust does not have access to these data, and they are not processed and stored by Evrotrust. The Subscriber may at any time stop using these functionalities.

7.3.1.3. Access to the Subscriber's Profile in the Application requires knowledge of a PIN code, which is known only by the Subscriber. The PIN code is not stored in an accessible form by Evrotrust. It is only stored in an encrypted form, in a way that allows only the Subscriber to use it. In the event that the PIN code is not known, including if it is forgotten by the Subscriber, access to the Application can be restored only by successfully passing again through a process of facial recognition. To initiate such a process, the Subscriber needs to provide data provided during their registration (for example, national identification number, phone number, e-mail address or other data). Where the provided data matches data of an existing user of the Application, the

facial recognition process is initiated, and upon successful completion the Subscriber is provided the opportunity to choose a new PIN code.

7.3.2. Entering personal data

The Subscriber shall enter its personal data as follows:

- a) After creating the security codes, the Subscriber shall enter its personal data according to the fields provided in the Evrotrust application and confirm its accuracy by clicking the "Next" button. By this action, the data is automatically sent to the Evrotrust system;
- b) The Subscriber will have the opportunity to correct the entered data by clicking the „Next“ button.

7.3.3. Identification

The identification of the user and the verification of the data provided by them in the Mobile Application is carried out in the following way:

- a) The user takes a clear image of their valid identity document with the camera of their mobile device, in compliance with the instructions for taking the picture. The image is automatically sent to Evrotrust's system.
- b) The data from the identity document is automatically recognized by the Evrotrust system and presented to the user for information. In the absence of integration with a primary data source (register) or in the event that the identity document does not have an NFC chip or does not contain the relevant data required for registration, the user shall check the data extracted from the identity document and, if necessary, edit and/or supplement it.
- c) The user may be given the opportunity to enter additional information required for the provision of the services, as well as optional additional information.

Automated or semi-automated identification is then performed, as follows:

7.3.3.1. Automated identification

- (1) If technologically possible and connected to a relevant primary data source (register) in the country issuing the identity document, an automatic check for the validity of the identity document is performed, the user's data is extracted from the register in machine-readable form and used by Evrotrust for identification;

- (2) When an identity document with an NFC chip is used, the identification is based on data extracted via the NFC chip of the user's identity document;
- (3) The user takes a picture of their face with the camera of their device according to the instructions displayed in the Mobile Application;
- (4) If technologically possible, automated identification is performed, by an automatic comparison of the user's face biometrics extracted from the photo taken by them in the Mobile Application, with the user's photo obtained according to item (1) or (2) above;
- (5) Upon successful identification according to item (4) above, the Subscriber is considered to have been successfully identified and his identity has been verified.

7.3.3.2. Semi-automated identification

In the event of unsuccessful automated identification under item 7.3.3.1, as well as in the absence of integration with a primary data source (register) in the relevant country issuing the identity document or in the absence of a scanned NFC chip on the identity document, a verification of the steps taken under item 7.3.3.1 is carried out by a supervisor, or a real-time video conference call is held via the Mobile Application between the Subscriber and an operator, depending on the identification method applied. In the event of successful identification performed by the operator, or in the event the identification is confirmed depending on the identification method applied, the identification and the identity of the user is confirmed. In the presence of publicly available registers for verification of the validity of the identity document or the status of the user, such verification is carried out *ex officio*. Depending on the identification method used, the user may be required to take additional actions, including re-presenting an identity document, providing additional images, participating to a telephone conversation, etc.

7.3.3.3. Other identification methods

Depending on the technological availability, the identification of the user for the purposes of using the Mobile Application may be carried out through other identification methods permitted by the applicable law in the relevant country, including through a EUDIW or a notified electronic identification scheme with assurance level 'high', through a certificate for a qualified electronic signature or for a qualified electronic seal issued in accordance with letter a), c) or d) of Article 24, paragraph 1a of Regulation (EU) No 910/2024, through another identification method which

ensures the identification of the person with a high level of confidence, the conformity of which is confirmed by a conformity assessment body, or through the physical presence of the natural person or an authorized representative of the legal person through appropriate evidence and procedures, in accordance with national law. In these cases, the user is informed about the necessary steps of the identification process through the interface of the Mobile Application or in another appropriate manner, including through published description of the relevant method in the relevant Policies and Practices on the Evrotrust website.

7.3.4. Contact details

Upon successful identification, the Subscriber shall fill in contact details as per the electronic form in the mobile application. Contact data may also be filled in in advance.

7.3.5. Confirmation of the registration and conclusion of the Contract

The conclusion of a contract between the Subscriber and Evrotrust requires confirmation of the registration by the Subscriber:

- a) To complete the registration process, the mobile application will send to the mobile phone number and e-mail address designated by the Subscriber messages with 6-digit confirmation codes;
- b) Upon the successful entry and acceptance of the codes by the Evrotrust system, the Subscriber shall press the "Confirm" button whereby it requests from Evrotrust the issuance of a QESQC and makes a request for signing the contract.
- c) By performing the actions under (b), the Subscriber requests from Evrotrust the remote QESQC issuance service, and Evrotrust will issue the Subscriber a QESQC in real time and ensure the signing with a qualified electronic signature of the General Terms and Conditions, the Personal Data Protection Policy and the Declaration of Consent. For the avoidance of doubt, by pressing the "Confirm" button under (b), the Subscriber enters into a contract for use of the mobile application and an individual contract for issuance of a QESQC under these General Terms and Conditions, and the registration process is completed;
- d) The signed GTC will be sent to the Subscriber;
- e) The text of the contract (the General Terms) shall be available for storage on the Subscriber's device in a way that allows its download and storage on a local device, as well as subsequent

reproduction in the "Settings" menu of the application and on the Evrotrust's website. The contract will be concluded in Bulgarian or in another language supported by the mobile application and selected by the Subscriber. By selecting the language of registration by the Subscriber, it is assumed that the Subscriber understands such selected language.

7.4 QESQC

The QCQES issued by Evrotrust upon request through the Mobile Application is published in the Evrotrust certificate register immediately after signing by the Subscriber of the contract under these General Terms and Conditions. Upon Subscriber's explicit request, the Subscriber may make a legal statement by activating the relevant functionality of the Mobile Application for control over the issued certificates, if available. The issued qualified certificate has a validity period depending on the Policy for the relevant certificate, and this period begins from the date of its publication in the Evrotrust certificate register.

7.5 CHANGE OF DEVICE

Evrotrust's mobile application allows the Subscriber to add a new device:

- a) Upon changing the device or adding a new device, the Subscriber shall identify with provided by him/her and confirmed mobile phone number in the profile in Evrotrust, PIN code and successful face identification step, during which the corresponding part of automated identification technology is used, applicable during the initial identification of the Subscriber for the purposes of the registration in the application;
- b) The application may be used by the Subscriber through an unlimited number of devices. The Evrotrust system stores a list of all active devices through which the Subscriber uses the mobile application;
- c) Each of the devices used by the Subscriber may be deactivated via the mobile application, through the appropriate functionality.

7.6 REQUESTING SERVICES THROUGH THE MOBILE APPLICATION OF EVROTRUST

Upon successful registration, the Subscriber can request through the application various Services, subject to these General Terms and Conditions, to the extent they are available through its functionalities and interface. Based on the framework agreement for the use of the mobile

application concluded upon registration, the Subscriber may at any time request the use of new Services through it by means of the respective buttons in the application interface. With each such request, an individual contract is concluded between the Client and Evrotrust under the terms of the concluded framework contract. The individual contract is considered concluded from the moment the request is made by the Client.

7.6.1. In order to achieve the maximum level of security, in relation to certain services, Evrotrust or the Relying Party may request the application of a facial recognition process as a mandatory condition for the using of the service, including for additional confirmation when signing or sealing a document. In these cases, facial recognition is performed by using the relevant part of the automated identification technology, applicable to the initial identification of the Subscriber for the purpose of registration in the application. In the event when the Subscriber does not wish to go through the specified process, they may refuse to sign and/or seal the relevant document.

7.7 SDK MODULES FOR INTEGRATION

For certain of its Services, Evrotrust may provide the opportunity to conclude a contract and provide services using Software Development Kit (SDK) technology embedded in a mobile application of a third party – a partner of Evrotrust. When using services through such an embedded module, the Subscriber goes through the process of concluding a contract and requesting a trust service as described in section 7 of these General Terms and Conditions, and this happens within the framework of the Evrotrust interface integrated in the Partner's mobile application.

In cases where the relevant Services are requested and provided using an SDK module of Evrotrust integrated in a mobile application of a third party, the rules of these General Terms and Conditions concerning the Application and the provision of Services through the Application are relevant and shall apply accordingly.

Evrotrust bears no responsibility for the content, technological processes, efficiency or security of the application of the third party – a partner of Evrotrust, outside of the SDK technology provided and implemented in the partner's application.

8 SUBSCRIBER RIGHTS

8.1 RIGHT OF WITHDRAWAL

Where the Subscriber is a consumer within the meaning of the consumer protection legislation applicable in the European Union and the contract is concluded remotely or off-premises, the Subscriber shall have the right, within fourteen (14) days from the date of the conclusion of the contract, without owing any compensation or penalty, and without stating a reason why, to withdraw from the contract. If the Subscriber wants to withdraw from the contract, the Subscriber shall inform Evrotrust of their decision in writing before the expiry of the 14-day period from the conclusion of the contract. For the avoidance of doubt, it will be considered that the contract between Evrotrust and the Subscriber for the use of the Services provided through the Mobile Application has been entered into as from the time of signing the General Terms and Conditions by the Subscriber using the QCQES issued to them by Evrotrust. If the Subscriber wishes that the provision of the Services commences before the expiry of the period for exercising the right of withdrawal, the Subscriber shall make an explicit request to this effect. In such cases, if the Subscriber exercises their right of withdrawal after having requested the commencement of the use of the services before the expiry of the period for exercising the right of withdrawal, the Subscriber shall pay to Evrotrust the amount proportionate to what has actually been provided to them up to the time when the Subscriber notified Evrotrust of the exercise of their right of withdrawal. This also applies to any subsequent individual contract concluded by the Subscriber with Evrotrust based on a request from the Subscriber to use a new Service through the Evrotrust mobile application.

For a Service for which the contract stipulates an obligation for the Subscriber to pay, and the performance of which has begun with the Subscriber's express prior knowledge, consent and confirmation that the Subscriber knows that the Subscriber will lose the right to withdrawal after the contract is fully performed by Evrotrust, the Subscriber loses the right of withdrawal after the execution of the contract by Evrotrust. For the avoidance of doubt, such Services include, for instance the issuance of a short-term a qualified certificate for a qualified or advanced electronic signature, as well as the issuance of a short-term non-qualified certificate for an advanced electronic signature.

In this case the Subscriber expressly agrees and confirms that the Subscriber is aware that they will lose their right to withdrawal after having their requested short-term certificate issued.

8.2 RIGHT OF ACCESS TO THE SERVICES

The Subscriber shall have the right to access the Services subject to these General Terms and Conditions and to the access requirements set by Evrotrust for each individual type of Service.

9 SUBSCRIBER OBLIGATIONS

The Subscriber shall have the following obligations:

- a) to adhere to the terms and conditions set by Evrotrust for the provision of the Services, as well as to any policy adopted by Evrotrust and designed to protect or improve the quality and reliability of the Services;
- b) to ensure by themselves the technical equipment, software, access to mobile telephone services and data transmission services over a mobile network necessary for their use of the Services;
- c) when using the Services:
 - to comply with the General Terms and Conditions, the other applicable documents of Evrotrust, the contract and the applicable Bulgarian, European and other national and international law;
 - not to infringe foreign pecuniary or non-pecuniary rights, including intellectual property rights;
 - to immediately notify Evrotrust of any case of committed or detected violation in the use of the Services;
 - not to impersonate another person or otherwise mislead Evrotrust or third parties about their identity and their representative power;
 - to provide correct, accurate and complete information required by Evrotrust in accordance with the General Terms and Conditions, the Policies and Practices and the applicable law, in their registration and identification, as well as in any other use of the Services;
 - to verify the completeness and accuracy of the content of the certificates issued to them and, in case of any discrepancy between the submitted information and the content of the respective certificate, immediately notify Evrotrust;
 - to discontinue using the Mobile Application, the Services and the certificates issued to them in case of suspicion of any compromise of the PIN code, the manner of identification in the Mobile

Application or in case of loss of their device with Evrotrust mobile application installed thereon, or of smart card/flash drive on which the certificate is issued, and immediately take actions for their cancellation, blocking or revocation, including by informing and requesting assistance from Evrotrust, to the extent this is necessary;

➤ to immediately notify Evrotrust in the event of any change in the information provided by them in relation to the use of the Services, as well as request immediate cancellation of the certificates issued in the event of any change in the information contained therein. When using a Mobile Application, the Subscriber shall, upon the occurrence of any change in the information provided by them, immediately update it through the relevant functionalities in the Application. Upon any change in the information provided by the Subscriber in the Application, the certificates requested and issued through the Mobile Application, which include data that has been updated, shall be automatically cancelled;

➤ to use the Mobile application, the Services, the certificates issued by Evrotrust and the key pairs only for their intended purpose;

➤ not to commit any Malicious Acts.

d) to take all care, take the necessary measures, in order to protect the means of identification in the Mobile Application, upon use of the issued certificates or use of other Services, as well as to protect their devices and smart cards. The Subscriber shall be solely responsible for the protection of their PIN code, password, and means of identification, as well as for all actions performed by them or by third parties through the use of their PIN code, password or means of identification;

e) The Subscriber/Signatory/Creator agrees that Evrotrust will process all data necessary for their successful identification and registration and for the verification of the data provided by the Subscriber, as well as any additional information necessary for the provision of the Services. The Subscriber/Signatory/Creator agrees that Evrotrust will store such data and information in accordance with these General Terms and Conditions, its applicable Privacy Policy and the applicable law. For the avoidance of doubt, such consent shall not constitute a consent to the processing of personal data within the meaning of Regulation (EU) No 679/2016, but rather a contractual consent. The applicable legal grounds on which Evrotrust processes personal data are described in detail in its applicable Privacy Policy;

f) when using the Mobile Application and the Services provided through it, not to upload, publish, save, distribute, send or make available in any way to third parties, documents, content or references (links) to such that:

1. is contrary to Bulgarian, European and other applicable legislation, these General Terms and Conditions and other applicable documents of Evrotrust, Internet ethics, rules of morality and good manners;
2. contains violence or a threat to life and bodily integrity (including animals), harms the good name of another or calls for the commission of a crime, violence, racial, national, ethnic or religious enmity or the commission of terrorist activity;
3. has pornographic, sexually explicit or any other content that threatens the normal mental development of minors or violates the norms of morality and good manners;
4. violates any property or non-property rights or legal interests of third parties, including materials that are subject to intellectual property rights of third parties, except with the consent of the right holder;
5. constitutes unauthorized advertising materials, junk mail, spam, 'chain letters', redirected with alias subdomains, 'pyramid (Ponzi) schemes' or other forms of attracting customers;
6. contains information about other people's passwords or access rights without the consent of their holder;
7. contains computer viruses or other computer codes, files or programs designed to interrupt, disrupt or limit the functioning of computer software, hardware or telecommunications equipment;
8. with a file size exceeding the maximum sizes specified by Evrotrust.

10 EVROTRUST'S RIGHTS

a) shall have the right to:

- at its discretion and without giving a notice, suspend or temporarily restrict the Subscriber's access to the Services, including timely restricting functionalities of the Application, if there is evidence or suspicion that the latter uses the Services in violation of the applicable law or the General Terms and Conditions;

- require from the Subscriber and process all data necessary for the successful identification and registration of the Subscriber and for the verification of the data provided by the Subscriber, as well as any additional information necessary for the provision of the Services;
 - publish in its certificate repository all certificates issued by it in accordance with the requirements of the law and the Subscriber's instructions (as far as they are admissible);
 - in accordance with applicable legislation, to store documents uploaded by the Subscriber to the Application and information systems/channels/interfaces of Evrotrust and/or sent to third parties, and has the right to provide them to the competent state authorities in cases where this is necessary to preserve the rights, legitimate interests and security of Evrotrust or third parties, as well as in cases where they are duly requested by the relevant state authorities.
- b) In the event of any breach by the Subscriber of any of the obligations provided for in Section 9, para. 3) above, Evrotrust shall have the right to terminate or suspend immediately and without notice the provision of the Services or to terminate unilaterally and without notice the contract, as well as to notify the competent authorities in case of suspicion of any unlawful actions.

11 EVROTRUST'S OBLIGATIONS. SERVICE LEVEL (SLA)

11.1 EVROTRUST'S OBLIGATIONS

The obligations of Evrotrust shall include:

- to provide the Services to the Subscriber in accordance with the General Terms and Conditions and the applicable law;
- to take immediate action in relation to the cancellation, renewal and revocation of certificates issued by it upon establishing the relevant grounds for this;
- to immediately notify the Subscriber of the circumstances regarding the validity or reliability of a certificate issued by it;
- to publish and update electronically a publicly available list of the certificates revoked by it;
- at least every 2 years to carry out external audits performed by independent auditors in order to verify the compliance of the trust service with the requirements of Regulation (EU) No 910/2014 and the applied Policy.

Evrotrust warrants that:

- 1) it operates by strictly observing the terms and conditions referred to in this document, the requirements of Regulation (EU) No 910/2014, Regulation (EU) 2016/679 and the applicable law;
- 2) its provided services do not infringe any third party copyrights and license rights;
- 3) it uses technical equipment and technologies that ensure the reliability of the systems and the technical and cryptographic security in the implementation of the processes, including a secure and protected mechanism/device for the generation of keys and for the creation of an electronic signature/seal in its infrastructure;
- 4) it issues qualified electronic signature/seal certificates after verifying by means permitted by law the submitted information;
- 5) it securely stores and keeps information related to the certificates issued and the systems operations;
- 6) it observes the established operating procedures and rules for technical and physical control, in accordance with the terms and conditions in its Policies and Practices upon provision of qualified trust services;
- 7) upon request, it issues the relevant types of certificates, observing the conditions and procedures referred to in this document, the relevant Policies and Practices and the applicable standards;
- 8) it ensures an opportunity for immediate cancellation and revocation of a qualified certificate;
- 9) it cancels and revokes certificates under the terms and conditions of the relevant Policies and Practices;
- 10) immediately notifies the interested persons (Relying Parties) after a certificate has been revoked;
- 11) it provides conditions for the precise determination of the time of issuance, cancellation, renewal and revocation of the certificates;
- 12) it has established and follows procedures of identification and establishment of the authenticity of the Signatory/ Creator;
- 13) it ensures measures against tampering of certificates and for ensuring the confidentiality of the data it has access to in the process of creating the signature/ seal;
- 14) it uses reliable certificate storage and management systems;

- 15) it ensures that only duly authorized employees have access for the purpose of making changes in the data, establishing the authenticity and validity of the certificates;
- 16) it takes immediate measures in case of any technical problems related to security;
- 17) upon expiry of the period of validity of a qualified certificate, it revokes its validity;
- 18) it informs the Signatories/ Creators and the Relying Parties about their obligations, their conduct and their due care in the use of and relying on the trust services provided by Evrotrust, as well as about the correct and safe use of the issued certificates and the provided trust services related thereto;
- 19) it uses and stores the collected personal and other information only for the purposes of its activity of providing trust services in accordance with the applicable law;
- 20) it does not store or copy any data of the creation of user private keys, unless it provides the Remote signing service in accordance with Regulation (EU) No 910/2014;
- 21) it keeps available funds which enable it to carry out its activities;
- 22) it has the necessary insurance for the time of its activities;
- 23) it maintains trusted personnel having the necessary expertise, experience and qualifications for carrying out the activities;
- 24) it keeps a certificate repository wherein it publishes the issued qualified certificates
- 25) it maintains an up-to-date Certificate Revocation List (CRL);
- 26) it publishes on its website other circumstances and electronic documents, according to these General Terms and Conditions, and the applicable law;
- 27) it provides protection against changes to the certificate repository by unregulated and unlawful access or due to an accidental event;
- 28) it immediately publishes in a certificate repository the issued and signed certificates;
- 29) it performs periodic internal audits of the activities of the Certification Authority and the Registration Authority;
- 30) it performs external audits by independent auditors and publishing on its website the results of such audits;
- 31) it uses in its activities certified software and hardware, as well as secure and reliable technological systems;

32) it maintains on its website a list of Registration Authorities, a list of recommended software and hardware for use by users, templates, forms, and other documents for the benefit of Subscribers.

Evrotrust shall be liable to the Signatory/Creator/Subscriber and the Relying Party for any damages caused by gross negligence or willful intent:

- a. resulting from failure to comply with the requirements of Regulation (EU) No 910/2014 in carrying out its activity of providing qualified trust services;
- b. resulting from incorrect or missing data in the qualified certificate at the time of its issuance;
- c. resulting from damages caused in case where at the time of issuing the certificate, the person designated as the Signatory/Creator did not have the private key corresponding to the public key;
- d. resulting from the algorithmic discrepancy between the private key and the public key entered in the certificate.
- e. resulting from failure to comply with its obligations to issue and manage qualified certificates;
- f. resulting from failure to comply with the established Policies for issuing a certificate in terms of establishment of the identity of the Signatory/Creator.

11.2 SERVICE LEVEL (SLA)

Evrotrust undertakes to:

- (1) provide guaranteed time for recovery of an interrupted service within forty-eight (48) hours in working days. The period shall commence from the time of submitting an alert for the existence of a problem, accepted and confirmed by Evrotrust.
- (2) provide a guaranteed level of accessibility of the services for a monthly period equal to 98%. Accessibility represents the total time within the calendar year during which the Subscriber is able to use the services upon the existence of its agreed parameters. Such accessibility parameter value shall not include the scheduled technical maintenance, or interruptions beyond the control of Evrotrust.
- (3) provide technical support of the services twenty-four (24) hours a day, three hundred and sixty-five (365) days a year, by registering and eliminating any technical problems within the

technological time for their servicing.

- (4) monitor the proper functioning of the services in order to ensure their continuity.
- (5) In case of breach of security or breach of integrity, which have a significant impact on the provided trust service or on the stored personal data, Evrotrust shall notify thereof without undue delay, but in any case within twenty-four (24) hours from the time when it became aware of the occurrence of the event, the supervisory authority and, where applicable, other competent authorities, such as the competent national information security authority or the data protection authority according to the terms provided in the legislation. Where a breach of security or breach of integrity is likely to adversely affect a Subscriber, Evrotrust shall also notify, without undue delay, the person concerned of the breach of security or breach of integrity.
- (6) Evrotrust has developed a procedure for filing, reviewing and resolving complaints and claims, through which Evrotrust serves its Subscribers.
- (7) The level of service (SLA) described herein applies only to Service Subscribers with whom specify specific parameters for the level of service other than those described have not been agreed.
- (8) The service level (SLA) described herein applies only to Services that the Subscriber uses and for which the Subscriber pays.

12 SUBSCRIBER RESPONSIBILITY

- 1) The Subscriber shall be responsible for fulfilling their obligations provided for in these General Terms and Conditions;
- 2) The Subscriber shall be solely responsible for the use of their PIN code or other means of identification, as well as for any use of their PIN code or other means of identification by third parties. The Subscriber shall be solely responsible for the protection of their devices with the Evrotrust mobile applications installed thereon, as well as of their smart cards, and for any use thereof;
- 3) The Subscriber shall indemnify Evrotrust for any suffered damages and lost profits, including for paid pecuniary sanctions, paid attorney's fees and other expenses, as a result of claims brought by, and/or compensations paid to, third parties in relation to a breach by the Subscriber of their obligations provided for in the General Terms and Conditions, the Policies and Practices

and any other documents that form an integral part of the contract, as well as for damages caused by failure by the Subscriber to perform their obligations under the applicable law.

4) The Subscriber represents and agrees that Evrotrust will not be liable for any damages caused to them in the use of Evrotrust services, unless they are caused by Evrotrust by willful intent or by gross negligence or if a legal act explicitly provides otherwise.

5) The Signatory /Creator shall be liable to Evrotrust and all Relying Parties if:

(a) in the creation of the private-public key pair, the Signatory /Creator has used an algorithm and electronic signature/seal creation devices that do not meet the requirements of Regulation (EU) No 910/2014;

(b) the Signatory /Creator does not comply in a precise manner with the security requirements set by Evrotrust;

(c) the Signatory /Creator does not require from Evrotrust to cancel or revoke the certificate after becoming to know that the private key was misused or is threatened of being misused, including, but not limited to, in the event of loss or theft of the flash drive/the smart card on which the certificate is issued, or of a device on which the Evrotrust mobile application is installed, or the PIN code or other means for identification becoming known by or available to unauthorized third parties;

(d) the Signatory /Creator has made false statements before Evrotrust which are also relevant to the content or the issuance of the qualified certificate;

(e) where the certificate was issued with a stated Creator and a person authorized by the latter, the Signatory /Creator shall be liable for the failure by such authorized person to fulfil their obligations.

6) The Subscriber, the Signatory /Creator or the authorized representative of a legal entity shall be responsible for the content of the attached files and the consequences of their use.

7) The Signatory/Creator shall be liable to Evrotrust if the Signatory /Creator or their authorized person has provided incorrect data, respectively has concealed data related to the content or the issuance of the certificate, as well as when the Signatory /Creator or their authorized person has not properly stored the private key corresponding to the public key stated in the certificate;

8) The Signatory/Creator shall be solely responsible for the protection of the private key after providing the data for activation of the smart card (in the case of issuance of a certificate on a flash drive/smart card).

13 LIABILITY AND LIMITATION OF LIABILITY

13.1. Evrotrust, as a qualified trust service provider:

- a) shall be liable under Art. 13 of Regulation (EU) No 910/2014, as well as under the applicable law, for damages caused by failure to comply with obligations under Regulation (EU) No 910/2014 or applicable legislation and caused by willful intent or by gross negligence on third Relying Party individuals or legal entities that are not parties to a contract with it;
- b) shall be liable under Art. 13 of Regulation (EU) No 910/2014, as well as under the applicable law, for damages caused by failure to comply with obligations under Regulation (EU) No 910/2014 or applicable legislation and caused by willful intent or by gross negligence to the Subscriber;
- c) shall not be responsible or liable to the Subscriber for any damages resulting from incorrect, incomplete or inaccurate data provided by the Subscriber;
- d) shall not be responsible or liable for any damages caused:
 - on the software, hardware, the device or other telecommunication equipment, or for loss of data resulting from materials or resources sought, loaded or used in any way whatsoever through the Services provided;
 - as a result of an untimely request by or failure by the Subscriber to require the suspension/blocking/termination of the Mobile Application, services and/or the certificates issued to the Subscriber;
 - as a result of failure by the Subscriber to perform any of their obligations as provided in the General Terms and Conditions or in any other documents forming an integral part of the contract, as well as for damages caused by failure by the Subscriber to perform any of its obligations according to the applicable Evrotrust Policies and Practices or the applicable law;
 - as a result of the use of a certificate beyond the limits of its intended purposes and the restrictions on its validity as stated therein.
- e) shall not be responsible or liable for the availability and quality of any goods and/or the content of services provided to the Subscriber by third parties, including Relying Parties. Insofar as the actions of such third parties are not under the control of Evrotrust, the latter shall not be responsible for the unlawful nature of the activities of such third parties or for the emergence, warranty, performance, amendment and termination of obligations and commitments

undertaken in relation to goods or services offered by such third parties, and shall not be liable for any damages and lost profits arising from such relationships.

f) shall not be responsible or liable for the non-provision of the Services upon the occurrence of circumstances beyond its control - force majeure events, accidental events, problems in the global Internet network or in the electronic communications networks or in the provision of services beyond the control of Evrotrust, Malicious Actions, as well as in case of unregulated access or intervention by third parties in the operation of the Evrotrust mobile application through the Subscriber;s device, or by means of unlawfully obtained login data of the Subscriber in their profile in the Evrotrust application;

g) shall not be responsible or liable for the non-provision or deterioration of the Services as a result of tests or maintenance performed by Evrotrust for the purpose of inspecting equipment, connections, networks, etc., as well as tests aimed at improving or optimizing the provided Services. In such cases, Evrotrust shall notify the Subscriber in advance of any possible temporary non-provision of the services, respectively of their deterioration, by sending an IM message or a short text message (SMS), or an e-mail to the registered e-mail, or in another appropriate manner;

h) shall not be responsible or liable for damages under Regulation (EU) No 910/2014 in relation to services, processes and technologies that are outside the scope of this Regulation (EU) No 910/2014;

i) Evrotrust does not have the obligation and the objective opportunity to control the manner in which and/or the purposes for which the Subscriber uses the provided Services, nor is it obliged to search for facts and circumstances indicating the performance of illegal activity, respectively, it is not liable for the documents, content or references to such that the Subscriber uploads and/or sends to third parties through the Application or the information systems/interfaces/information channels of Evrotrust.

13.2. Evrotrust shall not be liable in cases where the damages occurred are the result of failure to take due care, failure to fulfill any obligations or lack of knowledge in the field of PKI (Public Key Infrastructure) technologies by Subscribers or Relying Parties.

13.3. Further, Evrotrust shall not be liable in cases of damages caused by:

➤ the use of a certificate beyond the limits of its intended purposes and restricted effect stated

therein, with regard to the purposes for use and the limitation on the value of the transactions;

- illegal actions by Subscribers or Relying Parties;
- provision by the Signatory /Creator of the means of identification on the signature/seal creation device and access to the private key to third parties;
- careless and/or gullible behavior of the Subscriber, including, but not limited to, cases of providing data for access and use of the Application (for example PIN code), providing personal data and/or personal ID documents to third parties, going through the process of identification and/or creating a Profile of the Subscriber on a device outside the Subscriber's control, etc.
- accidental events having a force majeure nature, including Malicious Actions of third parties (incl. hacker attacks, frauds, seizure of the signature/seal creation device, access to the private key, the means of identification becoming known without the knowledge of the Signatory, etc.);
- use of a certificate that was not issued or used in accordance with the requirements and procedures of the applicable Evrotrust Policies and Practices;
- use of an invalid certificate (a certificate that has been cancelled or revoked);
- untimely act of revocation or cancellation of a certificate (the consequence of a request delayed by the Signatory /Creator or due to reasons beyond the control of Evrotrust);
- compromised private key corresponding to the public key in the certificate due to a reason outside of Evrotrust;
- poor quality and functionality of the software products and hardware devices used by the Signatory /Creator and Relying Parties.

13.4. The compulsory insurance shall cover the liability of Evrotrust to Signatory s/Creators, respectively Relying Parties, for pecuniary and non-pecuniary damages caused up to the limits determined in the applicable law. Upon the occurrence of an event that may allow for a claim to be brought that is covered by the insurance, the affected person shall notify in writing Evrotrust and the Insurer within seven (7) days after becoming aware of the event. The insurance coverage for non-pecuniary and/or pecuniary damages caused to the Signatory /Creator shall not exceed the amount established by the applicable law. The liability, respectively the insurance, shall not cover any damages caused by or related to:

- failure by a Signatory /Creator to fulfil their obligations;
- compromise or loss of a private key of a Signatory /Creator due to failure to take due care to

protect the key during use;

- failure by the Relying Party to comply with the requirements for verification of the validity of the electronic signature/seal and the qualified certificate;
- force majeure and other circumstances beyond the control of Evrotrust;
- claims directly or indirectly based on, related to or arising from any loss suffered or lost profits (including loss of turnover, sales, revenue, profits or any indirect, consequential or other losses), to the extent permitted by the mandatory provisions of applicable law.

14 PRICES

Evrotrust has determined the following method of payment by Subscribers for the provision of trust services:

- a) Evrotrust provides the services either free of charge or for a fee, in accordance with the prices the prices announced by Evrotrust. Information on the prices applicable to the respective services is available in the Mobile Application and/or on the website of Evrotrust, as well as in other appropriate places, according to the way in which the respective services can be requested;
- b) Evrotrust reserves the right to unilaterally change the announced prices, subject to the requirements of the applicable law and to what was agreed with the Subscriber, if any. The change in prices shall not affect the use of services already paid for by the Subscriber;
- c) The prices for the use of the services shall be paid to Evrotrust by the Subscriber or by the Relying Party according to the arrangements between them;
- d) The prices for the use of the services shall be due as agreed with the Subscriber:
 - for each individual use of a service; or
 - for subscriptions/ fixed-term services – in advance for the relevant subscription period/ term; or
 - in another way as agreed with the Subscriber.
- e) When the price for a given service is due by the Subscriber, the form/template/interface through which the Subscriber makes the request to use the service shall contain and specify information about its price along with all due taxes and other expenses, and an indication on when the obligation to pay for the service arises;
- f) Payment by the Subscriber for the services may be made:

- via the Apple Pay application (available in the App Store for iOS devices) or Google Play (for Android devices);
- as a value-added service of the mobile operator which the Subscriber has subscribed with, with the value of the Evrotrust services used by the Subscriber being included in the monthly invoice of the Subscriber issued by the mobile operator for the relevant month;
- by crediting by direct debit of the Subscriber's payment account with their prior consent, where Evrotrust has integration with the relevant payment service provider; or
- in another way established by Evrotrust.

15 AMENDMENTS AND TERMINATION

15.1 AMENDMENT OF THE GENERAL TERMS AND CONDITIONS

Evrotrust allows amendments to the General Terms and Conditions in the following cases:

- a) Evrotrust may unilaterally amend the General Terms and Conditions, notifying the Subscriber of any amendment to the phone number specified by them (including through a message on Viber and/or WhatsApp and/or other relevant manner), the e-mail or the address of the Subscriber, and in the absence of such - through a message displayed on the Subscriber's device through their Mobile Application (push notification), or in another way in accordance with the requirements of the law;
- b) Where the Subscriber does not agree with the amendments, the Subscriber may withdraw contract without stating any reason therefor and without owing any compensation or penalty. In such case, the contract shall be automatically terminated upon receipt by Evrotrust of the Subscriber's notice under item 15.1 (c), unless Evrotrust has explicitly indicated the possibility to continue using the Services under the terms and conditions applicable before the amendment. This rule for a possibility of withdrawal from the contract shall not apply in cases where the amendment to the terms of the General Terms and Conditions is due to an order or instruction of a competent authority;
- c) The Subscriber may exercise its right under item 15.1 (b) by a respective statement addressed to Evrotrust within one month from the notice under item 15.1 (a). If within the said period the Subscriber does not declare that it does not agree with the amendments, it will be deemed to be bound by them.

15.2 TERMINATION OF THE CONTRACT

a) Except in the cases provided for in these General Terms and Conditions, the contract shall also be terminated upon:

- suspension of the activities or termination of Evrotrust;
- termination of the support of the Mobile Application or deletion of the Subscriber's Profile from the Mobile Application, for Evrotrust's Services that the Subscriber uses through the Application;
- mutual consent of the parties; or
- in other cases provided by law or agreed between the parties.

b) The Subscriber shall have the right, at any time, at its own discretion, to stop using the Services. The Subscriber may unilaterally delete the Mobile Application installed on their device or to request the revocation of the certificates issued to them. In case the Mobile Application is used by the Subscriber on several devices, then the deletion of the Application on one of those devices shall not terminate the contract, unless the Subscriber has deleted their Profile.

15.3 MANAGEMENT OF STORED DOCUMENTS AFTER TERMINATION OF THE CONTRACT

15.3.1. Evrotrust manages and stores Subscriber documents under the following conditions:

a) Evrotrust mobile application: Evrotrust stores for the Subscriber in a secure environment, in encrypted form, all documents signed by the Subscriber through services accessible in the Mobile Application within the period agreed with the Subscriber – ten (10) years, in a way that provides the Subscriber with access to them. All documents that are delivered to the Subscriber through the qualified delivery service ('electronic registered delivery' within the meaning of Regulation (EU) No 910/2014) are stored in the same way. Those documents are stored by Evrotrust in accordance with the applicable legal requirements. The service is available only as long as the Subscriber has an active Profile in the Mobile Application;

b) Short-term QCQES: Evrotrust stores for the Subscriber in a secure environment, in an encrypted form, all documents signed by the Subscriber through an issued one-time QCQES for the period agreed with the Subscriber – ten (10) years. If there is an opportunity to download the documents through an active link sent to the Subscriber's e-mail, the link enables downloading and storing them within thirty (30) calendar days.

c) When using a device for creating a qualified electronic signature (QSCD): Evrotrust does not have access to and does not store the documents signed by the Subscriber at no time.

15.3.2. The deletion of documents shall not lead to the deletion of information intended to provide evidence of the sending, receipt and signing of documents through the mobile application.

15.5.3. The document storage in line with current Para 15.3 does not present a Service for qualified preservation of qualified electronic signatures (Qualified preservation service for qualified electronic signatures – PSES).

16 PERSONAL DATA PROTECTION

16.1 PERSONAL DATA PROCESSING

Evrotrust carries out its activity of provision of trust services in accordance with the requirements of Regulation (EU) No 2016/679 (hereinafter, the **GDPR**), the applicable law and in accordance with its applicable Privacy Policies which form an integral part of these General Terms and Conditions and the contract with the Subscriber.

The applicable Privacy Policies of Evrotrust include:

1. Privacy Policy Applicable to the Trust, Information, Cryptographic and Other Services Provided by „Evrotrust Technologies“ AD (all services);
2. Other privacy policies which Evrotrust may adopt and apply with regard to the provision of some of its services.

The *Privacy Policy applicable to certification, information, cryptographic and other services provided by Evrotrust* (specified under item 1 above) is applicable to the activities carried out by Evrotrust in the provision of services subject to these General Terms and Conditions. In respect of some of its services, Evrotrust may, in addition, provide for and implement special privacy policies relating to the processing of personal data by Evrotrust when providing these services. In the event of a conflict between the terms of the *Privacy Policy applicable to certification, information, cryptographic and other services provided by Evrotrust* and the terms of such special policies, the special policies shall prevail, but solely in respect of the processing activities related to the provision of the relevant services to which those policies relate. For all matters which are

not settled within the special policies, the provisions of the *Privacy Policy applicable to certification, information, cryptographic and other services provided by Evrotrust* shall apply.

Prior to the conclusion of the contract, the Subscriber shall get acquainted with the Privacy Policy applicable to the services requested by the Subscriber in order to be informed on the types of personal data are processed by Evrotrust, for what purposes and in what manner, as well as to be informed on their rights and all other important matters concerning the protection of their personal data in accordance with the GDPR and the applicable legislation.

17 FILING COMPLAINTS AND DISPUTE RESOLUTION

17.1. PROCEDURE BEFORE EVROTRUST

Any disputes arising out of or relating to a contract entered into under these General Terms and Conditions, including disputes arising out of or relating to the interpretation, invalidity, non-performance or termination of the contractual relationship, will be resolved by mutual agreement between Evrotrust and the Subscriber. Complaints regarding the use of certificates and trust services provided by Evrotrust will be reviewed by Evrotrust after written information has been submitted to:

Evrotrust Technologies AD

Address: 251G Okolovrasten pat Str., Business center MM, floor 5

1766 Sofia, Bulgaria

Tel.: + 359 2 448 58 58

Email: support@evrotrust.com

In carrying out this procedure, the complainant will receive a reply within one (1) month as of the receipt by Evrotrust of the complaint, except in cases where the applicable law explicitly provides for another period for reply.

17.2. EXCEPTIONS TO THE PROCEDURE BEFORE EVROTRUST UNDER ITEM 17.1

The above period and the above procedure shall not apply to disputes, complaints and requests related to the processing of personal data. Such requests shall be dealt with in accordance with the applicable Privacy Policy of Evrotrust and in accordance with the periods and requirements specified in Regulation (EU) No 2016/679 and the applicable law.

Requests related to personal data shall be sent to the following email address: dpo@evrotrust.com.

17.3. The European Commission keeps an out-of-court online dispute resolution platform, which is available at the following web address: www.ec.europa.eu/consumers/odr. On this platform, users can find a list of alternative dispute resolution (ADR) bodies that can assist in out-of-court/alternative dispute resolution. Evrotrust does not wish and is not obliged to participate in dispute resolution procedures before ADR bodies, unless such an obligation is explicitly provided for in the applicable law or Evrotrust has given its explicit consent to participate in such a procedure.

17.4. IN-COURT DISPUTE RESOLUTION

If no agreement is reached between the parties, the dispute will be referred for resolution to the relevant Bulgarian court of competent jurisdiction. When the subject of the dispute between the parties is property rights, it will be referred for resolution to a competent court based in Sofia City. If the Subscriber is a consumer within the meaning of the applicable consumer protection legislation and is established on the territory of a country other than the Republic of Bulgaria, the application of mandatory legal norms in that country, for which no derogation is allowed and which are intended to protect the rights of users is not affected by the choice of jurisdiction in this section.

18 POLICIES AND PRACTICES APPLICABLE TO TRUST SERVICES PROVIDED BY EVROTRUST

In accordance with the requirements of Regulation (EU) No 910/2014, Evrotrust includes in the issued certificates an object identifier (OID)/link (URI), through which Subscribers are able to check the Evrotrust Policies and Practices applicable to the provision of a trust service related to an issued certificate. Each of the Evrotrust services is provided in accordance with the Policies and Practices applicable thereto. The Policies and Practices applicable to the trust services provided by Evrotrust are publicly accessible on the website of Evrotrust: <https://evrotrust.com/tsp-documents/>. Each version of the relevant Policy and Practice for providing a qualified trust service will be applied until the approval and publication of a new version. The Subscribers and the

Relying Parties shall be obliged to get acquainted in advance with and to comply with the versions of the applicable Policies and Practices which are current at the time of using the Evrotrust services.

19 ACCESSIBILITY. LOGS. AUDIT/CONFORMITY ASSESSMENT

19.1 CONFORMITY ASSESSMENT

Evrotrust is audited at least once every twenty-four (24) months by a conformity assessment body accredited by the European Commission. The purpose of the audit is to confirm that Evrotrust, as a qualified trust service provider, and the qualified trust services it provides, meet the requirements set out in EU Regulation No 910/2014.

19.2 AVAILABILITY

Evrotrust ensures that the availability of the services is in accordance with the terms and conditions described in its Policies and Practices and in these General Terms and Conditions. Evrotrust provides uninterrupted access (24/7/365) to remote services and support services, with the exception of technical maintenance time.

19.3 LOGS

Evrotrust stores event logs which are necessary to evidence certain actions. Evrotrust collects the following information:

- a) System logs: These include records of the operation of the system, collected from the support services and from the tools of the operating system;
- b) Audit logs (Security): These are a set of chronological records related to security that provide documentary evidence of the sequence of activities that affected an operation, procedure or event;
- c) Application logs: These are records containing information about events that occurred within a software application. This information is retrieved from the software application and includes errors, warnings, and information events.

Evrotrust records the exact time of events which are significant/ important for the activity management, such as key management, clock synchronization, events related to identification of persons, issuance of certificates and others. Events are recorded in a way that cannot be easily

deleted or destroyed, unless they are reliably transferred to long-term backups within the period in which they must be kept. The records and logs are stored by Evrotrust for periods and in compliance with the requirements applicable to its activities. To the extent that parts of the records and logs could contain or represent personal data, information about them and the terms of their storage are contained in the *Privacy Policy applicable to certification, information, cryptographic and other services provided by Evrotrust* or in another privacy policy of Evrotrust, if applicable.

20 OTHER PROVISIONS

20.1 DEFINITIONS

When enforcing and interpreting the contract, the terms used will have the following meaning:

- a) **Information system (system)** is any individual device or set of interconnected or similar devices, which in the execution of a certain program provides, or one of the elements of which provides, automatic data processing;
- b) **Devices** are hardware products or parts thereof intended to connect to the interfaces of public electronic communications networks. The devices through which the services can normally be used are mobile phones or other smart devices that meet the technical requirements for normal installation and operation on an mobile application of Evrotrust;
- c) **Mobile application** is software installed on the Subscriber's smart device which enables the use of the services;
- d) **Malicious Actions** are actions or inactions that violate Internet ethics or harm individuals connected to the Internet or associated networks, including without limitation sending unsolicited messages (unsolicited commercial messages, SPAM, JUNK MAIL), channel overflow (FLOOD), gaining access to resources with foreign rights and passwords, taking advantage of deficiencies in information systems for own benefit or information retrieval (HACK), change of identity, performing actions that may qualify as industrial espionage or sabotage, damage or destruction of information systems or information arrays (CRACK), sending "Trojans" or causing the installation of viruses or remote control systems, disrupting the normal operation of other users of the Internet and associated networks, performing any actions that may qualify as an offense or violation under the applicable law.

- e) **Accidental event** is an event or action unforeseen and unpredictable at the time of the conclusion of the contract, wherein there is no culpable conduct by Evrotrust and which renders impossible the provision of the services.
- f) **Server** is a device or system of connected devices on which, or on any of which, system software is installed for the performance of tasks related to the storage, processing, reception or transmission of information.
- g) **Electronic signature, electronic document, electronic identification, trust services, electronic seal, qualified electronic signature certificate, advanced electronic signature, qualified electronic registered delivery service, and all other terms used in the contract** shall have the meanings given to them in the relevant applicable regulations such as, but not limited to, Regulation (EU) No 910/2014, the Bulgarian Electronic Document and Electronic Trust services Act and the Bulgarian Electronic Identification Act, unless explicitly provided otherwise in the contract;
- h) **IM (Instant Messaging) messages** are encrypted messages that the Evrotrust mobile application receives through the information system (the system) of Evrotrust (push notifications).

20.2 INTELLECTUAL PROPERTY RIGHTS

The relations between Evrotrust and the Subscriber with regard to intellectual property rights shall be settled as follows:

- a) The intellectual property rights over the Mobile Application and over all other software applications and products, databases and other materials and resources in relation to the provision of the services shall be subject to protection under the Bulgarian Copyright and Related Rights Act, shall belong to Evrotrust or to the designated person who has transferred its right to use to Evrotrust, and may not be used in violation of the applicable law;
- b) The Subscriber's right of access to the services shall not include the right to copy or reproduce information and to use intellectual property objects, unless it is a matter of information negligible in its volume which is intended for personal use, provided that this does not unduly harm the legitimate interests of the authors or other holders of intellectual property rights, and in the event that such copying or reproduction is carried out for non-commercial purposes. Notwithstanding the above, the Subscriber shall not be entitled to remove the trademark and

other intellectual property right marks from the materials it is provided access to, regardless of whether the Signatory of those rights is Evrotrust or a third party.

c) To the extent that the services provided by Evrotrust and the ways to access those services include functionalities that allow the provision of intellectual property objects by the Subscriber (e.g. providing an image for a profile picture, saving images in the documents section of the Mobile Application, sending a document for signature, etc.), the Subscriber (a) grants Evrotrust the right to use the relevant objects solely for the purposes of and to the extent necessary for the provision of the Services in accordance with the legal requirements for this; (b) is responsible for ensuring that the provision and use of such intellectual property objects in this manner does not violate the intellectual property rights of third parties; (c) is responsible for the content of the materials and the data provided, including for ensuring that they do not violate the rules of applicable law, the public order and the morality.

20.3 WRITTEN FORM

The written form shall be considered to have been complied with by sending an IM message, a short text message (SMS), an e-mail message, a message in a mobile application of Evrotrust, pressing a virtual button in a mobile application or website or marking a field (marking the relevant functionality) in a mobile application or a website and the like, insofar as the statement is technically recorded in a way that allows its reproduction.

20.4 INVALIDITY

The Parties declare that in the event that any of the clauses of the contract is held to be invalid, this will not entail the invalidity of the contract, other clauses or parts thereof. The invalid clause will be replaced by the mandatory norms of the law or the established practice.

20.5 APPLICABLE LAW

The provisions of the legislation applicable in the Republic of Bulgaria with the exception of its conflict of law rules shall apply to any issues not settled by the contract. The UN Convention on Contracts for the International Sale of Goods shall not apply. If the Subscriber is a consumer within the meaning of the applicable consumer protection legislation and is established on the territory of a country other than the Republic of Bulgaria, the enforcement of mandatory legal norms in

that country, for which no derogation is allowed and which are intended to protect the rights of consumers, shall not be affected by the choice of applicable law in this Section.

21 SPECIAL RULES IN REGARD TO CERTAIN JURISDICTIONS

21.1 SPECIAL RULES IN REGARD TO KENYA

The rules in this section are valid only in relation to the territory of the Republic of Kenya, being applied in addition to the other rules described in these General Terms and Conditions and with priority over them, when they conflict with them.

21.1.1. On the territory of Kenya, all services detailed in these General Terms and Conditions, are provided by Evrotrust Technologies AD, with company and contact information as indicated under item 1.1 of this document, in cooperation with local agent Geda Limited, P.O. Box 48625 Nairobi 00100, Kenya (hereinafter, **the Local Agent**). The Local Agent, in partnership with Evrotrust, is recognized as meeting the requirements of the Electronic Certification Service Providers (E-CSP) License in Kenya and is duly accredited by the Communications Authority to offer such services in Kenya.

21.1.2. In Kenya Evrotrust issues qualified certificates for electronic signature (Kenya Qualified Certificate for Electronic Signatures) within a specific PKI part of its internal hierarchy and in compliance with Evrotrust's Policies and Practices applicable to the respective services.

Thus, Evrotrust RSA Root CA issues qualified electronic certificates that are hierarchically dependent in terms of infrastructure in the Evrotrust domain. Evrotrust RSA Root CA issues Evrotrust RSA REG.KE Operational CA 2025 with OID: 1.3.6.1.4.1.47272.2.23.

The Certification Authority Evrotrust RSA REG.KE Operational CA 2025 issues the Qualified Electronic Signature (QES) and Advanced Electronic Signature (AES) Certificates in accordance with Article 28 of Regulation (EU) No 910/2014 only to a natural person (referred to as **Electronic Signature Signatory/ Signatory**). Depending on the profile and the issuance Policy, it may be used to certify authorship on electronic documents, for identification or authentication upon access to web applications, protected communications and electronic signing of documents (in different standards - PDF (PaDES), XML (XaDES), and other standard formats (CaDES). Qualified

certificates for electronic signature may also be used to sign document packages (ASiC-E), as well as e-mails (based on S/MIME (Secure/ Multipurpose Internet Mail Extensions/ Protocol for secure e-mail transmission via the Internet or a cryptographic system for protecting the messages transmitted via e-mail and the data stored on various media). The certificate may also include data about a legal entity associated with the natural person on whose behalf the Signatory will sign. In such case, Evrotrust does not certify the representative power of the natural person Signatory against the legal entity but only that there exists a legal relation between them.

The types of profiles of qualified certificates for electronic signature issued by Evrotrust for Kenya are as follows:

21.1.2.1. Qualified certificate for QES (Evrotrust REG.KE Qualified Natural Person Certificate for QES), OID: 1.3.6.1.4.1.47272.2.24

A qualified certificate for QES (QCQES) is issued for the purpose of establishing the authorship of a natural person – Signatory, on electronic documents signed electronically and accompanied by the certificate.

21.1.2.2. Qualified certificate for AES (Evrotrust REG.KE Qualified Natural Person Certificate for AES), OID: 1.3.6.1.4.1.47272.2.25

A qualified certificate for AES is issued in compliance with all Policies and Practices for issuing qualified certificates under item 20.7.2.1. The difference is that the electronic signature is not created in a qualified (electronic) signature creation device.

21.1.3. The legislation applicable in the Republic of Bulgaria, with the exception of its conflict-of-law provisions, shall apply to all issues not settled by the contract related to the provision and use of electronic identification and trust services, unless otherwise provided and enforced by the legislation of the Republic of Kenya in which case it is the latter which will be applicable.

21.1.4. All disputes arising from or related to this contract, including disputes arising from or related to the interpretation, invalidity, non-performance or termination of contractual relations, shall be resolved by mutual agreement between Evrotrust and the Subscriber. If the parties do

not reach an agreement, the dispute will be referred for resolution to the competent Bulgarian court, unless otherwise provided and enforced by the legislation of the Republic of Kenya in which case it is the relevant Kenyan court which will be competent.

21.1.5. Regarding the processing of personal data in connection with the provision of services in Kenya by Evrotrust in cooperation with the Local Agent, the relevant section of the *Privacy Policy applicable to trust, information, cryptographic and other services provided by Evrotrust* shall apply.

21.2 SPECIAL RULES IN REGARD TO NORTH MACEDONIA

The rules in this section are valid only in relation to the territory of the Republic of North Macedonia, being applied in addition to the other rules described in these General Terms and Conditions and with priority over them, when they conflict with them.

21.2.1. On the territory of North Macedonia, the services for electronic identification - eID, and electronic identification through a web interface - webID, described in these General Terms and Conditions, are provided by Evrotrust Technologies DOOEL - Skopje, a limited liability company, with a unified tax number (UTN) 4080020591119, address : Veniamin Machukovski str., No1/2 - 31, fl. 3, 1000 Skopje, North Macedonia (hereinafter, **Evrotrust Macedonia**), tel.: +389 2 3109 300, T: +389 2 314 4444, e-mail: office@evrotrust.mk, support@evrotrust.mk. The remaining trust and other services described in these General Terms and Conditions are provided by Evrotrust in accordance with this document. In the context of provision of electronic identification services, all necessary references to Evrotrust contained in the text of the General Terms and Conditions and the other applicable Evrotrust documents shall be deemed to be references to Evrotrust Macedonia.

Evrotrust Macedonia is a company - provider of an electronic identification scheme (eID) in the Republic of North Macedonia and is included in the Trust List of the Ministry of Information Society and Administration of North Macedonia. The electronic identification scheme of Evrotrust Macedonia covers the provision of the above-mentioned electronic identification services to Subscriber for the territory of North Macedonia, subject to compliance with all legislative requirements in the territory of North Macedonia and all requirements described in the Policy and practice when providing a service for electronic identification of Evrotrust Macedonia. The

specified document is publicly available on the website of Evrotrust Macedonia: <https://eid.com.mk/>. Each version of the Policy and Practice applies until a new version is approved and published. Subscribers and Relying Parties are get acquainted in advance with and comply with the version of the applicable Policy and Practice which is current at the time of using Evrotrust Macedonia's electronic identification services.

21.2.2. The legislation applicable in the Republic of North Macedonia, with the exception of its conflict-of-law provisions, shall apply to all matters not settled by the contract and related to the provision and use of the electronic identification services according to the electronic identification scheme registered by Evrotrust Macedonia.

21.2.3. All disputes arising from or related to this contract, including disputes arising from or related to the interpretation, invalidity, non-performance or termination of contractual relations, shall be resolved by mutual agreement between Evrotrust and the Subscriber. If the parties do not reach an agreement, the dispute will be referred for resolution to the competent Macedonian court, if the case is related to an electronic identification service (eID or webID), or to the competent Bulgarian court, if the case is related to a trust or other service under these General Terms conditions. If the subject of the dispute between the parties is property rights, the dispute will be referred for resolution by the competent court in Skopje, Republic of North Macedonia, if the case concerns the electronic identification service, or in Sofia, Republic of Bulgaria, if the case concerns the qualified trust services.

21.2.4. Regarding the processing of personal data in connection with the provision of services by Evrotrust Macedonia, the relevant section of the *Privacy Policy applicable to trust, information, cryptographic and other services provided by Evrotrust* shall apply.

21.3 SPECIAL RULES IN REGARD TO ROMANIA

The rules in this section are valid only in relation to the territory of Romania, being applied in addition to the other rules described in these General Terms and Conditions and with priority over them, when they conflict with them.

21.3.1. On the territory of Romania, the electronic identification - eID, and electronic identification via web interface - webID services described in these General Terms and Conditions are provided by Evrotrust Technologies SRL, a limited liability company, with registration number 49798208, address: Strada Nerva Traian, Nr. 27-33, Birou Nr. 6, Scara B, Etaj 1, București Sectorul 3, Romania (hereinafter, **Evrotrust Romania**), tel.: +359 2 448 58 58, e-mail address: office@evrotrust.com, support@evrotrust.com. The remaining certification and other services described in these General Terms and Conditions are provided by Evrotrust Technologies AD as provided in this document. In this context, all necessary references to Evrotrust contained in the text of the General Terms and Conditions and the other applicable Evrotrust documents shall be deemed to be references to Evrotrust Romania.

Evrotrust Romania is a company - provider of an electronic identification scheme (eID) in the Republic of Romania and is included in the List of third parties that verify the identity of persons remotely using video means (*Lista terților de verificare a identității persoanei la tășită utilizare mijloști video*), maintained by the Romanian Digitalization Authority (Autoritatea pentru Digitalizarea României/ ADR). The electronic identification scheme of Evrotrust Romania covers the provision of the above-mentioned electronic identification services to Subscribers for the territory of Romania, in compliance with all legislative requirements on the territory of Romania and all requirements described in the *Policy and Practice for the Provision of Electronic Identification Service* of Evrotrust Romania. The specified document is publicly available on the Evrotrust website. Each version of the Policy and Practice applies until the approval and publication of a new version. Clients and Relying Parties are obliged to get acquainted in advance with and comply with the version of the applicable Policy and Practice which is current at the time of using the electronic identification services of Evrotrust Romania.

21.3.2. All matters not settled by the contract related to the provision and use of electronic identification services under the electronic identification scheme registered by Evrotrust Romania, shall be governed by the provisions of the legislation applicable in Romania, excluding its conflict of laws rules.

21.3.3. All disputes arising from or related to this Agreement, including disputes arising from or related to the interpretation, invalidity, non-performance or termination of the contractual

relationship, shall be resolved by mutual agreement between Eurotrust and the Subscriber. If the parties fail to reach an agreement, the dispute shall be referred for resolution to the competent Romanian court if the case is related to an electronic identification service (eID or webID), or to the competent Bulgarian court if the case is related to trust or other service under these General Terms and Conditions. In the event the subject of the dispute between the parties is property rights, the dispute shall be referred for resolution to the competent court in Bucharest, Romania if the case concerns the electronic identification service (eID or webID), or in Sofia, Bulgaria if the case concerns trust or other service under these General Terms and Conditions.

21.3.4. With regard to the processing of personal data in connection with the provision of services by Eurotrust Romania, the relevant section of the *Privacy Policy applicable to certification, information, cryptographic and other services provided by Eurotrust*.
